إِنَّ الْحَمْدَ لِلَّهِ نَحْمَدُهُ وَنُسْتَعِينُهُ وَنُستَغْفِرُهُ
 وَنَعُوذُ بِاللَّهِ مِنْ شُرُورِ أَنْفُسِنَا وَسَيِّئَاتِ أَعْمَالِنَا
 مَنْ يَهْدِ اللَّهُ فَلَا مُضِلَّ لَهُ وَمَنْ يَضِلَّ فَلَا هَادِيَ لَهُ
 وَأَشْهَدُ أَنْ لَا إِلَهَ إِلَّا اللَّهُ وَحْدَهُ لَا شَرِيكَ لَهُ
 وَأَشْهَدُ أَنَّ مُحَمَّدًا عَبْدُهُ وَرَسُولُهُ

يَا أَيُّهَا الَّذِينَ آمَنُوا اتَّقُوا اللَّهَ حَقَّ تَقَاتِهِ وَلَا تَمُوتُنَّ إِلَّا وَأَنْتُمْ مُسْلِمُونَ
 يَا أَيُّهَا النَّاسُ اتَّقُوا رَبَّكُمُ الَّذِي خَلَقَكُمْ مِنْ نَفْسٍ وَاحِدَةٍ وَخَلَقَ مِنْهَا زَوْجَهَا وَبَثَّ مِنْهُمَا
 رِجَالًا كَثِيرًا وَنِسَاءً وَاتَّقُوا اللَّهَ الَّذِي تَسَاءَلُونَ بِهِ وَالْأَرْحَامَ إِنَّ اللَّهَ كَانَ عَلَيْكُمْ رَقِيبًا
 يَا أَيُّهَا الَّذِينَ آمَنُوا اتَّقُوا اللَّهَ وَقُولُوا قَوْلًا سَدِيدًا يُصْلِحْ لَكُمْ أَعْمَالَكُمْ وَيَغْفِرْ لَكُمْ ذُنُوبَكُمْ
 وَمَنْ يُطِيعِ اللَّهَ وَرَسُولَهُ فَقَدْ فَازَ فَوْزًا عَظِيمًا

يَتَائِبُهَا الَّذِينَ آمَنُوا اتَّقُوا اللَّهَ حَقَّ تَقَاتِهِ وَلَا تَمُوتُنَّ إِلَّا وَأَنْتُمْ مُسْلِمُونَ ﴿٧٢﴾
 يَتَائِبُهَا النَّاسُ اتَّقُوا رَبَّكُمُ الَّذِي خَلَقَكُمْ مِنْ نَفْسٍ
 وَاحِدَةٍ وَخَلَقَ مِنْهَا زَوْجَهَا وَبَثَّ مِنْهُمَا رِجَالًا كَثِيرًا وَنِسَاءً
 وَاتَّقُوا اللَّهَ الَّذِي تَسَاءَلُونَ بِهِ وَالْأَرْحَامَ إِنَّ اللَّهَ كَانَ عَلَيْكُمْ رَقِيبًا ﴿٧٣﴾
 يَتَائِبُهَا الَّذِينَ آمَنُوا اتَّقُوا اللَّهَ وَقُولُوا قَوْلًا سَدِيدًا ﴿٧٤﴾

Chapter 1. Islamic pragmatism

1. Muslim land

Uk and dominion

The following countries are deemed part of empire and if Muslims come to rule Britain, will be dominated. They represent a threatening source of tax fraud and money laundering for us just as they are at present a system of theft for the rich British:

Falkland Islands, Isle of Man, Ireland, Gibraltar, Guernsey, Jersey, Australia, Canada, Cayman Islands, Virgin Islands.

Such an irony that the words Ireland and Islands comes up so often in these “countries” names but Britain is referred to as “Isles” as per the British Isles. As a Muslim I can see, only 6 Islamic countries in the top 40 GDP per capita, KSA, UAE, Qatar, Kuwait, Bahrain and Oman. Out of 40 that’s pretty low! This century Muslims are to be near to 40% of the entire world population:

$$40\% \times 40 = 16$$

There should be already 16 rich Muslim countries ideally. I think the Union Jack needs to go green!

Muslim territory

“London”, Londonistan is as an Ugrlish (Urdu and English mixed) is a pretty much, a Muslim country now, given christians don’t have babies....meaning:

1. The future of UK/ USA is Islam in the sense that the original country, from where Anglo-Americanism comes from, Britain, is becoming Dar al Islam in just a few decades time (as per 2050 or 2060 as a rough date for Muslims being more in number than non-muslims).

2. UK, at least, for sure, is already more practising Islam than Christianity, if you take into account, who is practising what, and how many children are born in wedlock (ie. In marriage), then, yes, Islam is the dominant religion in both the UK and the USA (as per similarly 2 million attending weekend services but christian population having many who are not living with, if children; or not knowing, if adult; their parents).

Perhaps it's kinder to say Christians don't tend to get married and have children:

1. For example in New York, homosexual sex is more common than normal sexual intercourse (as per number of partners estimated for New Yorkers)
2. Throughout USA, illegitimate children are the norm (as per some states such as Delaware having only half of total children living with both parents, with the rate of divorces taken as a measure of this)

Islamic Republic of Pakistan

Pakistan adds around 5-6 million to the world population yearly, compared to 19 or 16 million for India and China respectively (altogether that's coming up to almost half a billion every decade). This makes it one of the three greatest contributors to the human population, and by 40-50 years time it may also be third in the list, after India and China, of largest countries.

We, as Pakistanis, have been wrongfully accused of being extremists when there is an undeniable freedom struggle and we are freedom fighters. We, as Pakistanis, have been wrongly imprisoned by the American opinion that the false-flag wars waged against us and co-religionists are indeed just wars.

We, as Pakistanis, come from a Pakistan which is emerging in the world, slowly but surely. Because it is right at the top there in terms of people power and economic potential, the 6th largest country in the world, which should by rights be the 6th largest economy in the

world, should be doing better than 27th largest GDP (PPP) in world economics.

This makes Pakistan, a leader in manpower, all the more a force for development and economic power. Indeed for an economic power to emerge from the present Pakistan it should outgrow and overcome it's emerging world economy status and be, by it's own rights, and by rights of it's own power in foreign fields and over foreign lands, a new Pakistan.

2. Muslim territory

As Muslims, we discovered the Americas around a millennium ago. It was named Al Ardh al Majhoola, meaning a part of the world no one previously knew.

Further, as Muslims, we are rulers over most of the main kingdoms of ancient times, including Biblical civilisations.

Add to this, the knowledge of the virtuous city, one in which evils such as the dishonouring of women, the injustice done to the poor, taking of another's life without reason and such things cannot even be thought of.

Christians on the other hand have no philosophy and so are stuck with the extremism that they exist to take vengeance for the murder of Jesus. This makes them resort to the Biblical savaging of the Ammonites and Amalkites as their religion. To slay every last child, woman, man, sick person, religious person, animal in our cities.

Given the world comprises of countries and countries consist of cities, this is why we have had world wars one and two, and global war of terror, or on terror, as some might say. Democracy is simply a weapon that allows the people to say every last person should be killed.

The definition of New Pakistan

New Pakistan is the unofficial Pakistani outside of the official definitions of state and so on. It includes *homo Pakistanus* as a broad term for everybody.

Greater Pakistan

“So what if our state is obliterated? We will build a new Pakistan. We will build a better Pakistan. We will build a greater Pakistan.” -

Zulfikar Ali Bhutto at UN 1971

Pakistan as a world power

A passionate Pakistan is a brand the government uses to sell the name of the country to those outside of the country, indeed this passion of the people of our country can make us a world power.

Pakistan and the rest of the world

Pakistan, including the nation states Uk (Little Pakistan), Usa (New Pakistan), Bangladesh (formerly East Pakistan), India (part of Pak-subcontinent), Indonesia (named after a Pakistani river) and China, will inshallah stand up against all enemies such as from Christian orthodoxy or Jewish plotters or any other threats. Other than Latin America which was borne from the demise of Muslim Spain, only Australia and New Zealand are other countries.

India as a new Pakistani superpower

India is expected to become a mahan taqat or megapower or gigapower (basically a great power, the world's greatest superpower) by 2050. It's GDP will be twice or thrice American GDP according to predictions (86 trillion as compares 39), it is a traditional point of comparison or a point of departure in the the analysis of Pakistan.

Indonesia as a Muslim Pakistani superpower

Indonesia, it's GDP (PPP) predicted at 14 trillion is behind USA, and begins to offer a perspective on how USA fits in to the world better.

Offering Indonesia as an example is good because it shows the world a Muslim country leading the others.

Uk and Usa as Pak powers

Uk- The Islands in the Pacific, the Mediterranean and the South East Asia Islands under British rule come under the banner of Pakistan, for example West Indies, named either after a Pakistani river or a Pak subcontinent country, will be part of Pakistani colonisation.

Usa- The term newfoundland comes from the Arabic ardh Majhoola, when Muslims first discovered America. Any constitutions drawn after this can and should reflect the nature of the fact that the Holy Quran pre-dates the bible in it's existence in the Americas.

3. Muslim overcoming of White Christian Britain

About Pakistan

Pakistan was founded on 14th August 1947 with the official name The Dominion of Pakistan when independence was taken from the British followed by India the next day. The first leader was Muhammad Ali Jinnah known as Quaid-e-azam, he was inspired by the great philosopher and poet, Muhammad Iqbal also Allama Iqbal.

It was not until 23 March 1956 when the Muslims such as Sheikh Muhammad Asad and other Islamic scholars as they are known or Ulema in Urdu, changed it to the Islamic Republic of Pakistan. It was around that time that the objectives resolution, a constitutional reform in Pakistani history was made, at that time Liaqat Ali Khan was first prime minister of our country.

Defining New Pakistan

Since then much history has passed, as documented in the study

of Pakistan, mut'alla-e- Pakistan (Pak Studies), the country has three major shuhada, Liaqat Ali Khan and the Bhutto father and daughter: Zulfikar Ali Bhutto and Benazir Bhutto.

Their party, the PPP is the opposition to the ruling government party, the Muslim league and is favourite to come to power in the 2018 elections. Imran Khan, a former cricket world-cup- lifting captain turned politician is now scheduling his own ascension to power and forwarding his dream of a new Pakistan or a naya Pakistan where his party, the Tehreek-e-Insaaf (meaning movement for social justice) come in to rival both the Pakistan Muslim League and the Pakistan People's Party.

Naya Pakistan

A new Pakistan may be formed in our former colonisers with the flag below, given the theory to conquer is a non-economic one, Usa too is included to form the colony, or city known as "London":

Diagram 1: Flag of Londonistan

4. Muslim Pakistanis

Pak-power salute

The white British should not escape from the label of either Muslim or Kafir, they are therefore not any longer simply, non-Muslims, they are disbelievers from now if they don't confess to Allah. They are either new Pakistanis who are white British Muslims or who are not new Muslims.

Not new Muslims (Kafir) - New Pakistanis

White British Muslims (Muslim) - Muslim Pakistanis like others

English people are proud that he sticks two fingers up to the world and world peace. He claims he won world war, when he didn't avert a holocaust, he claims gunpoint democracy to be good. We are not proud of the warmonger, where did Winston Churchill get this v-sign from? The helpers of Jesus would most certainly disavow such a thing!

From when the Messenger of Allah (SWS) promised heaven to the believers, is the answer. So it should be remembered no more a v-sign but instead the clasp in extension of the index- or forefinger and the middle finger. Pakistan is as a world power as opposed to the powerlessness and homelessness of the "English" man.

The fear of a Pak planet

Islam is a force for a long time now, it is the Asian, the African and the Middle Eastern religion of the blessed people and our respected countries. However should it now become the religion of choice of Europe too, there is a fear of a Pak planet.

Pak power

Pakistani power in great Britain stems from the fact that the unofficial religion of practice is Islam and almost half of the Muslims are from the sub-continent originally or their parents were. The places of worship have been transited from being lifeless abandoned homes for the rites de passage of the brainless and homeless themselves, into being real places of obedience to God and obeisance to God Almighty as is prescribed, where the truth is observed and spread from there to the rest of society.

Islam is taking no prisoners. We are the honest living, breathing forgiving. It has been our fortune to witness the turning of the death of the former christian England into a people and indeed societies who pray daily and weekly to Allah Almighty, Glorified and Exalted be His mention above what they associate with Him. Indeed Allah is Powerful above all things.

Incremental GDP

GDP itself ($GDP = GDP \text{ per capita} \times \text{country population}$), or properly termed gross domestic product could be better referenced by noting IGDP (incremental gross domestic product) since GDP contains successive years' IGDPs. It is noted that if IGDP is calculated, GDP growth is not at variation to the figures. If we look at IGDP, like if we look at GDP growth GDP becomes somewhat irrelevant. For example US GDP is 2nd in the world (if purchasing power parity is used) but India IGDP is always more (because it is historically a bigger country). IGDP is greater and growth too, soon GDP will be too.

Next year Pakistan will have had a GDP of over a trillion dollars for three successive years. China and by then, India will have an IGDP of over a trillion dollars. This means soon such economies will have a greater GDP and GNP (gross national product) than all others. Like it or not, Islam as a religion has taken a hold on our country in terms of socio- economico-political standing and the morality of an intrinsically racist labour market where whites earn 50% extra to Muslim, Pakistani and Bangladeshi people originally. This is while we are young, British-born, university-educated people.

Like it or not, most Americans actually factually pray to God in the day, more often to Allah than any other God. Islam is very relevant in America today and in UK where people pray more on Fridays than Sundays. Economic inequality is staggering in the UK. We are the excluded, marginalised ethnic groups who suffered 60-70% in the tragedy of Grenfell for example, from what we know of the names released so far of the victims.

The outstretched hands of Allah ta Ala though spell outright domination of Islam so how is this so for Muslims? To understand

this fact, that although God's hands are not tied up and truly despite of our own selves' being finding itself tied up outside of Islam, Allah ta Ala commands of us, inspite of the fact that we find ourselves resistant to Allah's din and accepting of the majority thinking, it is not those who said God's hand is tied up (like perhaps Jews or Christians) who have caused our economic stagnation; Jews haven't stagnated (the bani Israel), so why should we, bani Adam?

Our politics then, like our legal system, our politics is necessarily wider than Israeliyat or Judeo-christianity or bani Israel can offer. Islamiyaat is a necessary cause. Pakistaniyat, then, is our necessary cause. If we are doing badly, earning around \$22 thousand whilst others earn \$33 thousand per year, we must thank God for what we have and pray to do better. This is nothing to do with scarcity of resources and their allocation to infinite wants, astagfirullah!

IGDP, social equality and a theory for global economic parity
At the moment the status of Muslims who are Pakistani (mean disposable income- 16,600) or Bangladeshi (mean disposable income- £16,400) is: earn £1, white British earn 50p more (mean disposable income- £25,300), like in the rest of the world as a whole, earn half as much (Muslim 24% earning 12%) whilst Christians earn twice as much on average (31% earning 48%).
Did you know, a person in Britain is now more likely to go to Mosque than church? Statistics of 2021 Census are to show more Muslims than Christians in Birmingham, 2031 in London. A similar trend is emerging in the cities of Bradford and Leicester.

It is expected that of 67 million Britons, in 2051, 26 million will be registered as Muslim compared with 25 million as Christian. All while Af-Pak is made the graveyard for America, it's so-called exceptionalism and benevolence.

5. New Pakistanis

Not new Pakistanis

The macroeconomic argument and the argument from developmental economics will be introduced in the end but for now I will focus on the two- fold dichotomy whereby the Iqtisad (economics) of some modern countries is perceived as flawed. They should in fact no longer be termed as economies or world economies as such and now be relegated to a sunk cost on the world, a double entry without completion, a debt economy, an economy that is no economy.

The iniquitous are characterised by two things: Debt over equity: For companies with debts equalling their equity we use the term zombie companies, for countries with a "equity over debt" ratio, we need a new word for them, debt economies. Profit over equity: This is where profit is given reason to be made beyond investment for regeneration of the company. In terms of microeconomics it is where there is no charity, rather GDP being amassed is seen as sufficient reason, especially per capita to have power over other people.

Ideally, this is justice, where we borrow, or are geared only to the extent that we are creating profits. Justice comes when we recognise profits are there not for ourselves but to reinvest so to speak. So, theoretically, no matter what are cash balances, at present or what are our levels of drawing cash from the firm, a company must not have too much of one as compared to the other. If this goes on there is no need for money (fiat money) nor interest, nor inflation.

In summary, microeconomically there are two faults I have made with "dead" or "deadweight" economies:

1. Equity over debt. At present it is bad as it is obviously below 1
2. Profit over equity. It is absent and it is good.

Two wrongs don't make a right. Without a low gearing and without profit having social means and ends other than just state tax, dead economies must be brought to life by either conquest or by being given in reparations. There is no sense in trying to "resurrect" a country of zombie companies.

Macro-economically, there are a few fault lines too: That the labour market is a type of black market devoid of self-respect, intent on a history of slavery and that's pretty much it. That by now, the only important thing in life for people from the western hemisphere is this deadweight called economics, whether for them personally, for politicians in government or for the business person, who is as he is legitimised by the Islamically illegal world of banking and finance. In terms of developmental economics and ethics, there are faults too. Aid is inversely proportional to wealth generation. The richer countries give proportionally less. What is left is a need for economics to be outlawed altogether and in its place a new way given or a revolution initiated whereby the rest of the world, so-called 3rd world countries be given first priority as they deserve. Now is the perfect time to do this, because China and India are coming up. And Pakistan too, but in its own way.

With the list of the "largest" economies in the world, USA being the best example, we will find they are at the bottom of the list of charitable givers and government aid givers as well as having the greatest levels of debt owing abroad. The reason given here is not just that returns are low compared to gearing levels but that there are fundamental flaws such as borrowing levels, slavery and rapine which are ideological problems with imperialism which now must be addressed.

The dominance of Islam in Europe and US

The dominance of Islam in America and Europe is statistical (as per daily and weekly worship in places of worship), sociological (using families as a yardstick as opposed to single-parent families), equitable (by relying on indigenous and not occupier) and biological (through replacement and reproduction).

The lacite of Islam in Europe and US

The lacite of Islam in America and Europe, though is only pseudo-economic, relying on mean disposable incomes and per capita GDPs) and means security is a problem throughout the world with the problems of non-Muslim wars, nuclear arms and firearms unsolved.

Humanist perspective

Religiousness and belief in God are becoming increasingly Muslim-owned ideas in themselves. Further to this, the systems of economic production and biological reproduction are in danger and can only be safe in Islamic environment.

Muslim Pakistanis

A 2014 article in the daily mail shows how children are more likely Muslim in various areas in Britain:

Birmingham- 97,099 Muslim children 93,828 christian children
Bradford- 52,135 Muslim children 47,144 christian children
Leicester- 22,693 Muslim children 18,190 christian children

London-

Tower Hamlets- 34,597 Muslim children 8,995 christian children
Redbridge- 24,216 Muslim children 21,500 Christian children
Newham- 34,041 Muslim children 27,769 christian children

It proves from data from 2011 census that in a matter of decades London, Birmingham, Bradford, Leicester, in other words all the major towns in England are turning Muslim, inshallah.

6. Economies of scale

Gigaeconomics

History bears witness to the murder of millions of Muslims, in slavery, in Russia, India and Chinese revolution or occupation, in world wars, but never has humanity been so brutal as in the war of terror and it's individual wars, to murder millions of people in foreign countries.

In fact the eight calamities listed below, with the exception of the native Indian holocaust saw tens if not hundreds of millions starved to death or outright killed on the battlefield, adding up to a part of a billion people.

Ancient India, Egypt and Rome

Roman social structure was in the classes of wealthy, plebeian and slave. These correspond to the gods, royalty and warriors. Having a structural correspondence of social structure with its eventual psychic manifestation or position we can say with some confidence, the J-bomb Americans are trying to drop on the rest of the world is in fact no other than the plebeian class. The royals of Rome. Not our middle-class, indeed a fruitful export for global economics.

Indeed this is witnessed by the characters of the triumvirate, such as Matthew, Marc Anthony and Luke or Marc anthony and JC himself (Julius Caesar not Jesus Christ). The JC we are being told is our lord is in fact a psychic posit, from the plebeian class of ancient rome.

The psychic defence of trinity is deemed a reaction to judaism developed through denial by Rome. Father, son and spirit are proved as really wealthy, the royalty and the warrior.

Similarly the yogic chakras of Indian civilisation, where there are 6 or 7 centres betrays the zaat pat system or the caste system. What we are told is our root chakra is India's dalits taken as a whole, what we are told is our throat is no other than the Brahmins.

Antiqarian egyptology however, is not going to give us this phenomena as they have only sacrifice to offer. The social castes correspond to the 8 areas a good Muslim must sacrifice. Tawheed is the only solution to this world's problems of inequality and injustice.

Just like Hazrat Musa (AS) was sacrificed to recreate Israel in Exodus of the old testament and the coming messengers of Bani Israel taught harmony and sacrifice as well as good fortitude and love; equality is the way forward.

Clearly a trinitarian mindset created trinity yields the sevenfold evil. Only social equality can encourage our tawheed.

G7 - economies of shame

Eight calamities

Slavery
Red indian holocaust
Muslim India
Russian revolution
Chinese revolution
WW1
WW2
GWOT

G7 countries

Dutch and Italian
Us and Canada
GB and India
Russia
China
France and Germany
Japan
?

Diagram 2: Direct relationship between megamurder and trillionaire economies

It is neither a failure of capital and lax investment for the capitalists nor of governance and management for the communists that are the cause of the fact of slavery, holocaust etc. Rather slavery to GWOT are the cause of money-making, indeed the hiding of the war in these acts of megamurder are the cause of the money that is made.

The eight calamities, with the exception of GWOT, which comprises of undeclared war or wars, in fact the only one of the eight which are, in the sense of foreign death tolls of over a million, military combat wars; have caused the g7 economies in a direct one on one causal relationship.

The correspondence is all the more striking when we see angloamericanisms calamities create the evil effect in the relevant g7 countries concerned. So, how US and Canada are nothing more than the megamurder of Native americans, the Asian countries mentioned are no more than revolutions or occupation and so on. Indeed slavery and the Dutch west India company are synonymous, so-called world wars are over ending and lastly the war of terror itself is too part of cold war and brings permanent, perpetual, total and eternal war to it's fruition.

The war on terror is seen as both a cause and an effect so is different in this respect. In Pakistan there are such thing as economies of scale, our occupiers of Kashmir, India and China (Kashmir is -owned or -occupied) are gigapowers. The supergroup spells peace and means peace. Pakistan represents the gigaforce and gigapower itself.

7. The growth of proportionality

Population

	World	2519495	6056715	7207361	7936741	9322251
Country or area		Population (000)				
Rank		1950	2000	2015	2025	2050
1	India	357,561	1008937	1230484	1351801	1572055
2	China	554,760	1275133	1410217	1470787	1462058
3	United States of America	157,813	283,230	321,225	346,822	397,063
4	Pakistan	39,659	141,256	204,267	250,981	344,170

Diagram 3 - Biggest population countries

World peace

The U.S. was voted the biggest threat to world peace (due to world and global wars) by far, garnering 24 percent of the vote in a Gallup poll. Pakistan was a very distant second with 8 percent, followed by China (6 percent) and Afghanistan (5 percent). Below, we can see we can see the peaceable economies have acknowledged a depression from 2007 as growth has fallen from 13 % to slightly lower levels:

Diagram 4- The supergroup, spelling peace.

The supergroup spells peace:

Pakistan- The leading power (leader)

India- The staying power (Stamina)

China- The driving power (Change)

Western powers are then the superpower in the sense as they don't have any power, they are too oppressed by their parents. The supergroup are on average, one billion people-strong in their demography. So three Americas each or twenty Great Britains each in people power:

Pakistan: 22 crores (2017)

India: 130 crores (2015)

China: 140 crores (2016)

Average: 97 (almost 100 crores)

There is clearly a battle in which various socio-economic forces play out amongst humanity's civilisations and cultures and come to major powers or superpowers or megapowers that has been recognised. China has been termed the civilisation-state, for its sheer size and variety of cultures, whereas other major powers will

remain nations countries or states for now. Given India fits the bill of a civilisation in it's own right, Pakistan is modernity's version of the ideal state, country or nation. In mercantilism or post-mercantilism it may pose the alternative to the hegemonic democratic state, as it is a republic.

Even in Europe today, Spain represents the potential of the Islamic state and Greece, the republic, leaving the European developments of Nazism (a Rhinean development) and Fascism (a Roman one). Uk , Usa and the rest of the European union could in future seek to do the best for their people by trying to do the best for Islam, for the inclusion of the Muslim peoples and not by operating a policy of marginalisation thereof.

8. Indology

Industrialisation

Industrialisation was an unjust process and one that ingrained injustice into the lives of many, as history testifies. It is impossible to deny this for those of us who have read the history books. As the end of the last chapter shows, in any battle with the US, Islamic nations have seen their enemy as, given the split of Yugoslavia ends the Eastern bloc's development, not a war with the west but a fight to defeat it's enemies once and for all; and one in which the two major world superpowers are naturally allied to Islam and Islamic nations. India and China are not only neighbours and occupier neighbours for Pakistan but they are the only countries bigger than the States themselves.

The political onus has been set, in the creation of many Balkan or Caucasian Islamic states, for the destruction of the orthodoxy of Christianity and it's replacement with militant, political and indeed intellectual Islam. Now is the task of demolishing the enemies of Islam in a type of race for the top.

Country		2015 gdp		2050 GDP
India		7.97		85.97
China		19.39		80.02
US		17.95		39.07
Indonesia		2.84		13.93

Table 5 - Illustrating the trouncing of America as per GDP

If we are to fight and pray for the liberation of our lands from occupation, then surely the fight and prayer for liberation and freedom from servitude of un-Islamic economic and political forms is natural too. The fate of nations governs our every action. The history of nations is the cause behind a reasonable human beings' every behaviour. The torment of history is that if you know yourself and you know your history, to know yourself you must be yourself, but to have learned the lesson of history, one would have to be a Prophet.

I will go from the problem of democracy in the modern world coupled with theories of how they are idealistic social forms at best, originally social forms that are Islamic (Islamically acceptable at least) and how Muslims relate to them; to the history, problems, theory and practice of republics, right through to the ultimate solution of dar al Islam. It can be taken as from the view of the so-called nations and offering a final solution to genocidal christianity (Christianity at large) as the world's most popular religion.

9. Islamic democracies

History of democracy

As an idea, ancient Greece created Isonomy, which means equality of law, however, in the modern western countries they are barbaric and stupid: If everyone rules, there are no people left to rule. It is not that some are more equal rather some have coped better with more power than others.

The maxim of modern (or is it western) man seems to be “If I kill half a group of people, the rest will kill themselves off”: divide and rule but more primitive. Being Christian today after all the genocide seems to imply personality and having a so-called “relationship” with God, this means it is no longer socially pragmatic. Even here in the West, a lack of appreciation for the importance of the Holy lands is to spell the doom of the religion here in Usa and Europe. The faith and practice of Islamo- judeochristianity are heavenly, divine, sacred, and ultimately Merciful. If there is a failure of recognition of the fact that the practice of religion is from Allah, and that the religion acceptable to Allah is Al Islam, there will be a blindness towards justice and polity. This happens when the west unfairly wars against Muslim countries.

The consequence of these wars; asymmetric wars where the poor are suffering in wars waged originally by relatively richer peoples., is that these European and American countries, will no longer have a religion left in practice other than Al Islam. They will turn to Allah as a practical major faith and majority because of a failure of social pragmatism in war and especially asymmetric warfare. The combat war is not going to curb the spread of Islam and jihad, it will though curb the mercy of the Islamic prophetic teachings that underlie Islamo-judeochristianity.

Through the corruption of the corrupt biblical teachings, the incorrect practice of incorrect scripture, Islam will become a practical majority the west, in the very next census in the UK, for example.

Socially pragmatic forms of discourse, such as Islamic religious books, inform us here in the west or elsewhere, the innate wrong of taking a life unjustly. Westerners pay no heed to this, and this speaks volumes of the patience with which the Holy lands have bore them.

There is a more socially pragmatic way than military war approach of today's declined world. It is to acknowledge the Holy lands for what they are, Islamic lands. Indeed the future of western lands is that they too become Islamic lands. The Islamic presence is already an established and indeed a commoner faith and unlike christianism, a more popular and commoner faith, in Uk as an example.

Democratic theorists

American war as it's democracy - World and global war hides or masks lots of individual petty wars, in Afghanistan, Iraq and so on. In the American there is only war and being at the american gunpoint so gunpoint democracy is all that is on offer.

Democratism from dar al Islam-ism

Upholding rights of minorities - The white in Pakistan's flag is for protection of minority peoples.

Islam's abolishing of racial segregation in Usa- Malcolm X (Haji Malik Al Shabbaz) taught us to love our enemies and allowed coloured folk to not be segregated from them by reaching out for true equality.

Practicalities of modernity

Political and practical Islam - across east and west. Economically a non-Muslim approach is impossible in Muslim Britain because that would be innately racist and unfair on a Muslim peoples.

10. Islamic republics

Middle eastern examples

"Israel" is making a mockery of the Middle East today, an odd one out of all the Islamic republics. How many Arab republics are there in the Middle East, such as Egypt, Syria and Yemen.

Aflatoon (Plato)

Necessity is the mother of invention is itself a phrase from The Republic referring to the need of creating a state. Islam is conquering the west, already the major day of the rites of worship in Britain is a Friday, the Muslim day of congregational prayer. It is no longer a Sunday. America too is to make the transition by a couple of decades time. A further couple of decades and the western countries will become Muslim majority.

Muslim nation states

Arab republicanists brought about the revolutions of previous generations, and the Arab spring brings more revolutions. Just like the Arab states were founded as Arab republics, new European states should be created with the term Islamic republic in their name, given after all they are becoming dar al Islam soon.

From Palestine to Lebanon

Occupied to free, from Israel to something new. The word Bible comes from Arabic al jabeel, mountain; like the ancient Lebanese city of Biblos.

For the countries included in the western world, it is far from impossible that they fit this definition, given it is dar al Islam that informs their definition, either they are close to it, in the sense of coming up to it in their phylogeny or close to it in the sense of no longer being simply a democracy by virtue of the theory of Islam and Jannat.

The method of succession of the righteous caliphs of Islam is assumed as the founding or building block for both Islamic democracy, which lacks a practical definition and Islamic republics, which are founded on praxis and social pragmatism

G7 , “genocide seven”- How advanced economies are exploitative of genocide

With the exception of Asian economies India, China and Russia, and our respective revolutions: the struggle against the British Raj, the peasant revolution and the cultural revolution; the world's only

genocides, all of humanity's 7 genocides, correspond to the G7 economies. Directly on a one-to-one basis and these bear a causal relationship.

The matrix of genocide

[illegible]

Diagram 6: To whom the G7 owes itself in reparations (on the right, above)

Excluding the Asian countries and Turkey; a European, maybe one day an EC country, G7 accounts or 62% of global net wealth but as I shall show 100% of the genocide of our species. This is because I count the human population from 1500 when slave ships first came to America.

Through a strategy of genocide, logocide and ecocide, the destruction of a country's economics, the west has managed to barter the souls of our martyrs and achieve wealth in their way. This is why there is no justice in this world, because the rich make money in this way. If there was justice and compensation, only the victim country could and would benefit. In fact of all the genocides of the seven countries only Japan does this. It is an Asian country and it's compensation for being atom bombed by America is seen as Asian compensation given to the whole of Asia.

1. Genocide

It is a point of interest that the G7 excludes all of the great Asian economies correctly termed tributary Asian economies. I will deal with this with the economic rationale behind logocide, in summary, Asian economies are both the victim and the tributary.

2. Logocide

There is a common misconception of G7 economies where we bring the association of the wealth of specific countries when in fact that is a personal wealth (ie. GDP per capita) but there is also a victim behind the national product because there is a victim behind the creation of value of that nation. Victim countries are in fact tributary economies, to whom the peripheral country must be given in reparation.

3. Ecocide

G7 countries have more personal wealth (GDP per capita), their nominal GDP is much lower than Asian countries.

Global net present wealth

Global net wealth is a concept which is at present associated with the last century, the American century. However the Asian century has begun and now global net present wealth is just as much in the hands of the supergroup as it ever was in G7s'.

A point of comparison is midway of the century, 1950 saw American wealth at 40% of the global share, 2050 may see Pakistan, India and China with something similar. The E7s rise to replace the G7 isn't an unworthy point. When will the E7 rise to be richer than the G7? Will the vision of I-C-U be fulfilled? First, PWC say by 2050 E7 are to be twice as rich as G7, with half as opposed to 20% of global net wealth. Second, if Pakistan rises along with India and Indonesia, a Muslim economy will come out trumps not the old Christian world.

There is a struggle not to be a slave system. Great Britain enjoins the love of G7 economies of shame. Devoid of economies of scale, European or periphery economies are basically a slave system. However the great war of terror fought against Muslims was won by us Muslims, our hearts fully submitted to Allah tala. A tributary economy is then one where instead of having a global net wealth, a country has a global net present wealth is considered tributary as it creates an empowering "win-win" situation. So, for

example, in the future, Pakistan will both avoid slavery and servitude AND gain friendship abroad potentially.

Professor Samir Amin talks of peripheries and tributaries but looking at the last century and the fact that in the middle of the last century or in the 60's in fact. 40%, almost half of the world's net wealth, was in American hands, ie. mainly in slave-owner families' hands; surely we too admit, Europe and America aren't just peripheries of their tributaries, they are slave systems.

The G7 are therefore not allowed to murder their own masters (in the sense of whom they get to buy the dollar bullion) and bequeath world domination. Rather to have world domination is something which Asia is to earn.

11. Dar al Islam

Bottleneck between dar al Islam and dawlah al Islamiyah
A Muslim minority is different from a Muslim majority, however the minority is both daily/weekly and practical, and the majority is dar al Islam and dawlah al Islamiyah.

Pakistan as the new superpower dawlah al islamiyah

There is a big job of creating a country afresh and writing a constitution, indeed of nation building. This job is to be undertaken by Pakistan, Pakistanis abroad and our future generations who will live outside of Pakistan. The nations we are to conquer, include all western states, such as Uk and Usa.

For this it is vital that we removed Britain from being a global superpower by resisting them in Muslim India, now we will replace Usa as a superpower with Asian superpowers who will be more powerful than they have ever been across the globe.

Only once US has been annihilated in the global economy and is reduced to an alternative economics itself, will we, as Pakistanis then begin to get the ball rolling as to conquest of the west.

Mawlana Mawdudi said countries have kings and leaders, and philosophers, but only God can inspire them to have Divine code or Shariah of Islamic legislature, and Final Prophet (SWS).

Khulafa (ahles Sunnah), Aima (Shiah) are two recognised ways not pirs. This is the real message of true Islam. Pir-mureedi is wrong. Mawlana was imprisoned for saying Mirzais are seditious. If you reason pir-mureedi is wrong because, depending on your Khulafa or Aima, it is a very grave sin to be against God and shariah, or even according to Amir of a jammat.

Thinking about Khilafah, properly termed khilafah e ijtimayah, and siyasat, we fight for social equality but people think we are protesting economic inequality (because the westerners are all economic extremists) although it is a trust or amanah from God Almighty. Indeed all that concerns us is that we have tawakkal in Allah ta Ala.

Governance, society, politics are linked to the theory that governs Islamic reasoning and the observance of being a follower. Indeed as well as this our inner faith, creed and worship; our capacities and capabilities are always vastly undertapped in this respect.

Rasulallah, salAllahu alaihi wasalam, said to him while Ibn-Abbas was riding behind him on the same mount; "young man, I shall teach you some words [of advice]: Be mindful of Allah and you will find him in front of you. If you ask, ask only Allah and if you seek help, seek help only from Allah. And know that if all the nations were to gather together to benefit you, they would benefit you only with something that Allah had already prescribed for you, and if they gather together to harm you, they would harm you only with something that Allah had already prescribed for you. The pens have been lifted and the pages are dry."

Sunnah At Tirmidhi

Chapter 2. Dar al Islam

1. Dar Al Islam in the UK

In Islam, we say that the obedience to God Almighty is a great duty of human beings, all conceivable love (ishq e mijazi) comes from and is informed by the real true love which has inevitably superceded it, the love of God (ishq e haqiqi). The servitude of love of God comes if we know it is like a bird to fly free, the two wings of the bird are fear (of punishment for our behaviour by God) and hope (of reward for our behaviour by God). Indeed this is a Muslim's politics.

Because they are apolitical in the west, they call it atheist, they are therefore militant as opposed to political. Somehow their two wings of pre- and post-reformation give their extremist or terrorist forms the substantiation of their own. Religion of Islam is a definitely political force to be reckoned with here in Europe.

However due to Jewish Christ-killing fantasies the occupying faith is split into its national forms of first extremism- national facism (prevalent in Italy, America, France and Spain) and national socialism (prevalent in Britain, Germany etc.). They are either extremists, or as in Nazi terrorists who took revenge for Christ-killing by inflicting the "holocaust", they are terrorists.

Nowhere is this more prevalent than Nazi Britain of today where even physically the British Isles are split, separated half for extremists and a little bit for terrorists proper, Ireland. Indeed British are the wet nurses of terror and the mother of terrorism. If there are terrorists alive today, elsewhere, they were here in the Britain 50 years ago. The IRA have bombed London since the 1960's.

The abode of Peace

What is the solution to their extremist terrorism? Islam. The white-man has the guns but we Muslims have the numbers. We may fight them in the battlefield for the future faith of America. Where is that battlefield? Right here in the UK, and white Christians are on the

wrong side of Jesus. I call USA the 2080 nation, it may eventually have more Muslims by then. UK? (The 2060 nation).

Inshallah, by around then (2060) the Ummah will replace the king and the Islamic nation, the Islamic era can begin and fulfil the need for khilafah. Why not? The religious power of Islam has already been observed as the daily religion practice of UK (ie daily maximum adherents as per places of worship attendees) and is to expel Christians from their place of worship, the church (become the practical majority of weekly congregants) in a couple of years?

Diagram 7: UK Dar al Islam 2060

It's not a question of, inshallah, "there's no need for khilafah" in this world, a type of apologism that earns cheap points at the expense of our politics in the message we have a duty to convey. In fact, there is government, there are Islamic rules, there is always going to be political Islam. There isn't necessarily absolute facism forever

in America nor is there necessarily absolute Nazism in Britain forever.

Inside you- Aqeeda (Iman)
Ibadah (Islam)
Rasoom (Ihsan)

Outside world- Political (Khilafat)
Economics(Amanat)
Social (Musawat)

Indeed khilafah really means political khilafah and is just an extension of our duties in religion. It is truly a type of just leadership that the elderly or respected members of a community undertake.

2. War on Islam

The triad of US-Europe and Japan, a sort of triumvirate relic of ancient Rome, is coming to an end. They are earwiggers, spies, hackers and terrorists, they suffer economic stagnation and don't come close to Asian economic growth. A more Asian world model is now formed for the global "soft" power, militarist as opposed to terrorist; and in Pakistan, India and China, is financial development and financial growth.

The world wars which the triad favour themselves in, were attrition wars only, so too was slavery and the usurping of America (from native Indians). These are instances of megafamine only, megawar, megadeth and megaarmies are representative of military combat specific to the global war (on Islam), on terror.

Students of truth will note, the European wars of 1914 and 1939 were megafamines and today is a military era, and the indirect, non-military megawars of the past are gone.

The war on Islam

The war of terror is particular in the history of war in that no other war before has either seen so many victims fall to direct military combat warfare or if they have the perpetrators have not

themselves suffered millions of casualties to direct military combat warfare. The example of Russia in the war of 1939 is an exception as they fought with the central powers and then against as well.

Another peculiarity of the global war on terror is that millions of casualties are being sustained in individual countries, such as Iraq, Afghanistan etc. Something specific to direct military combat warfare never seen before. The holocaust doesn't count as Nazi Germany had in effect conquered Poland before inflicting casualties.

Megawar

The oppressors of the Ummah, the western allies, have for the first time in history created megawars, wars in which not only are millions of people killed but they are killed in foreign countries through direct military combat warfare which doesn't accrue in the home country itself.

During the last "world" war, Germany and Russia are famed for killing millions of people, however they did not do this abroad and if they did it was not through direct military combat warfare. Afghanistan and Iraq though, if we blame USSR and USA for starting them, are both wars of direct military combat warfare and they are only direct military combat warfare abroad of USSR and USA.

3. Psycho-ethics

The even keel of an Islamo-Christian Europe.

In Europe, the ebb and flow of Christianity, history of war, has led us to see modernity in constant inter-religious dialogue and mutual accusation of extremism and mutual antagonism of terrorist labels. Labelling theory is no doubt social constructionism's secret weapon and a highly dangerous weapon for Islamophobes who portray Islam as a threat as opposed to a liberating force in Europe.

However in a Europe which is in wartime priding itself on EU, NATO, UN and IMF foundations and post-European war failings,

this labelling of Muslims as non-liberators or a failure to accept Muslims as conquerors will simply not work. Why? Precisely because pre-1914 European war and for some years after that, there was not only Islamic shariah in this world but also for thirteen centuries, Islamic caliphate. This was indeed prevalent in Spain, Turkey, Southern France and parts of Italy.

Christianism, on the other hand is not even a religion on its own, without Judaism. Judaism, a petty minority faith in Poland and occupiers of Palestine, do not really constitute a religion either. To the nearest percentage, 0% of the world are Jews (30m/7,000m)

They are mere sociologists who label us as Muslims as criminals, it is the Christians who are criminals. Indeed the worship in the ordained places of worship of Great Britain, Jews and Christians, are a form of deviance from the Islamic norm of ibadah.

Daily worship in ordained places of worship, as a yardstick would no doubt measure Jews and Christians in USA as deviants also. Indeed Jews and Christians are only perverts, because Muslims put them to shame. Jews and Christians are followers of Jewish and Christian deviance from Islam. In fact they worship Muslims, Muslim prophets, Moses and Jesus (PBUH), Muslim men who had never heard of the words "Judaism" nor "Christianism". The proof is these words are absent in the present-day Bible.

Dar al Islam, land of Islam

A future land of Islam is possible in UK and US lands. Man for man, I know we can in the future dar al Islam mount the seat of government in London, Washington or Paris by creating democratic parties to fight left and right extremist parties by 2050. Such elections are taking place in France already where we recognise the main rivalry to be between extremists. The ebb of Christianity is to blame for this phenomenon. In fact the link of having elections fought by flanking extremists and the innate extremism of Christianity, we can hereby conclude, all non-Muslim parties in future dar al Islam, left and right of the spectrum, are terrorists.

4. Pak-ethics

Pakistani leadership of the world

“Our ultimate destination is to see Pakistan among the ten largest economies of the world by 2047.”

Pakistan Vision 2025

Pakistanis unite Anglo-american styles and Anglo-rhinean styles and absolve world war. Once Pakistan was created all world wars ceased. Whereas India stands for rule of the people and providing for people, as well as representing the future world top economy. China is for proper control over Japan, China and Japan together, economies measured by people and power in wealth .

Practice A- The Pakistani management model

The Pakistani management style is relaxed but charismatic, pragmatic and tolerant, and thorough (Patriarchal, there is no practice B). It sets itself apart by being at once personal and political but not as the Indian, simultaneously organised like a government or the Chinese with their supranational organisation.

Pakistani ethics

A Pakistani is the annihilator of world war, the leader in the arena of inner and outer peace. An Indian is like a government organisation when he is at his best performance. The Chinese are like the new macroeconomic king of the world.

Pakistani economics

Through socialism and democratism, *Sarmaya o mehnat* (capitalism-communism) has erased its own primitive form and will eventually yield to Islamic, non-totalitarian principles. Indeed it is through struggle, and God is near those believing slaves who struggle, God helps us; that the new macroeconomic world king

will be China, a communist country and then India, a dharmic country.

Here in the west, a *ma'mooli* majority is obtained by practising Muslims over other faiths. An Islamic homo economicus, homo Islamicus, then, is poised to rule. No death of God, no end of the economic man, only a new-born or reborn, Islamic man.

And so it was we call a born-again Muslim, a revert, not a convert. Because his or her innate faith, reason and goodness (his or her *fitrah*) is reborn, rebuilt and he is as new with all his previous sins forgiven. Similarly postwar Europe has claimed either that surreptitiously both so-called world wars were fought with Islam as the loser or that, as many other Muslims have claimed, other than myself only, with Muslims as the victors. We have, alhumdulillah, since then freed scores of countries in the Caucasus. We crushed Russia, we will emerge victorious over Europe, and then we will come to America soon in the future, inshallah!

Whether Islam is to become more acceptable and admissible as a form of religiousity in the west is only one point regarding the future. What is imperative to recognise here is that during the wars, so heinously sought by Europeans to define the world, the most casualties that were incurred were to famine (man-made famine), that these were in Muslim lands (Muslim India and Ukraine) and that the emergence of Pakistan immediately created a new Muslim confessional state, possibly the world's only truly confessional state, thereby creating replacement not only of the Judeo-Christian state leadership but of many former Christian majority countries, with a Muslim majority coming in the near future, that is in a few decades from now in all probability.

5. The failure of capitalism-communism

An historic perspective

The reason that Islam stands weak in the west, indeed the failure of political Islam, as it is spelt in English- Islam, as Peter Drucker puts it, to do with the spiritual man as opposed to the material man. It's the inclusive fighting the totalitarianist or the exclusivity of material

forms which include amongst them capitalism, communism, Nazism, fascism, socialism and democracy but exclude feminism, existentialism and liberalism.

Nevertheless we talk of the kingdom of heaven and that these people will be on the wrong side of Jesus in the battlefield, simply because of the failure to unite, unite upon the shariah, upon khilafah, politically as an Ummah of The Prophet (SWS). On the principles of politics it is going to be very hard to unite for Muslims in such a way that it is impossible to be divided. It is going to be very hard because of the nature of materialism, indeed the nature of material in the world, in the universe is such that it divides people.

The nature of management in an organisation, for example is that it is easier to adopt an authoritarian approach, with delegation and responsibility, as opposed to an inclusive participative managerial approach. The way it has evolved as an historical perspective, is such that materialism has managed to unite itself in it's own division and it's own divisiveness, in capitalism and communism. They both bare the mark of Cain and that is that Abel was the Muslim that they were murdering and the crescent represented by the capital c.

They are united, they are one against us in their war against us, Islamophobia and the global war on terror. Just like they were one millat they were against us. Their aim is to simply capture and waste wealth. To use and abuse inactive money. To pretend feeling complete as their mammon grows obsolete. To serve material excess.

India, France and Russia- Non- Muslim extremism

Whether Indian BJP members and voters are extremists and Pakistani political parties have no extremist party in power, whether Jehovah's Witnesses are outlawed from preaching in Russia for their extremism, and whether the right, left, and centre (because of Islamophobic candidates) are extremists in the 2017 French elections; many are still, blissfully unaware of non-Muslim extremists, talking of an immigrant tipping point here in Britain.

Blissfully ignorant of the war crisis and the new reality of Syria's proxy cold war, blissfully ignorant of Islam, its message and its Messengers. Blissfully unaware of Jewish or Zionist extremist apartheid in occupied Palestine, the British public, so much to blame, now say our country has reached, from a melting pot (like USA, full of immigrants) to a melting point or boiling point.

The immigration tipping point is here to stay, today.

Why capitalism-communism?

1. Islamophobia

Islamophobia means a fear of Muslims. Its meaning is translated, roughly, for Muslims, into a prevalent violent or otherwise dislike of Muslims, and Islam. Capitalism thrives on this by a preponderance of human life being devoted to money and its acquisition instead of how we are supposed to be as human beings for the love of God.

Communism arranges society according to precepts which are against the principles of Islam laid out in the Islamic legislature or Islamic shariah. Properly thought out capitalism is Muslimophobia and communism is Islamophobia proper.

2. The war "on terror", in fact against Islam

The war on terror was waged initially as a supposed reaction to the acts of some Muslims and has and still is against countries of Islam. The war is not something which has UN backing and it is replete with a terminology about it being against Islamists not Islam, when it clearly is Muslims who are the intended victims.

Why not.

1. Muslim Armageddon – The faith of man's recognition of world wars and global wars and the struggle through these wars

2. Muslim seventh heaven – The growth and development of the natural and religious law, Islam is holy as per religious law and also holy as per the natural law
3. The loss of the war on terror – The failure and death of modern Christian crusades, just like their so-called dark ages (whilst Islam was living in the Golden ages)
4. The failure of the morality of the west in the west – The end of western patriarchy (and it's replacement with Pakistani patriarchy)
5. The loss of wars to the Muslims – Pakistan, Iraq, Afghanistan, Syria etc. successfully defended by Muslims
6. Conformity to shariah – Islam and Islamic law is observed, East and west
7. Harb ad dafa and defense of the holy lands – We were attacked by colonial and imperial forces like no other civilisation before in history

6. Transformation and transition

In post-apartheid South Africa, transformed companies are where ownership and control (ie board membership) is transformed from white back to black. Transited governments are where at least part of the people, if not the constituency representative or the majority of the constituency, are transited from Christian to Muslim.

A transited people are where the demofidem, the popular religion, is transited from Christian to Muslim (UK and USA). So we talk of the “majority” of demofidem, the commoner faith as per daily adherents as in America, or weekly congregants as in Britain.

A transited religion then, is more widespread as per attendees and practitioners if not affiliates as per admissions. Transition can also be called transference.

Pakistani governance

Pakistani governance unites “Anglo-saxon”, American and Germanic forms as well as healing world war 1 and world war 2. Indian governance brings harmony in inter-governmental forces

and advances the idea of the civilisation-state. Chinese governance unites China and Japan and means US never got back on God Almighty for Sodom & Gomorrah by atom bombing Hiroshima and Nagasaki.

The transited country

Without any transitional governments, this country hopes to go from being english-speaking to having Urdu-hindi as most children's mother tongue, from being 90% church-going in some parts of the UK, 20 years ago, to being by and large Mosque-going, from christianism to Islam.

To replace Christianity and the church (and indeed English) with Islam and prefer Mosque as a means of salvation for attendees of daily activities in places of worship (in the States) and weekly worship in UK places of worship (and the replacement of English with Urdu/hindi) as unofficial first language is the undeniable job of future british governments which neither encourage heterosexuality nor marriage.

These governments NEVER created "Israel", no matter how much they sided with Jewish settlers in the occupation of Palestine. Indeed these governments are on the wrong side of the page and on the wrong side of Jesus Christ in this battlefield.

Transfer of seat of power/government

Now whites are no longer in the majority and now Christians are no longer in the majority, it is up to South-east Asians, who at around one million constitute the largest ethnicity, and it is up to Muslims to decide how to govern the people of Britain an it's dominion.

A separatist movement for the secession of Britain from the redundant church of England and indeed from Christianity can now take place. This will aim at the huge transfer of the seat of power or the huge transfer of the governance of the country, something to be assumed in a few decades from now. Should it be before religion has unofficially changed from Christian to Muslim, and

London is majority Muslim, we as Muslims should have no problem with that.

7. Praxis- a new Patriarchy.

For us, as Muslims, socialism is haram, and democracy is deemed a bidah. In spite of these offshoots of capitalism-communism being the only solution or reaction we have and can have to offer as Muslims, it is theoretically problematic to actively advocate either as they are too near to capitalism-communism

How do we intend to use Islam to defeat Capitalism-communism, it being totalitarianist as it is? The threat of American war crises is very real in Muslim countries just like the Communist threat has remained all too real to America since I can remember. Having read Michael Porter's "Competitive strategy" (1980), "Competitive advantage" (1985) and "competitive advantage of nations" (1990), and upon careful observation of the books it dawned upon me that what he saw of American success in world war or post-war at an economic level he was not wrong. The European war of 1939 culminated in Hiroshima and Nagasaki, the first urbicide of human history.

The relation of war causing and impacting economic activity or of economic change creating war however is a complex and intricate one. We understand war causes debt and debt causes war but even Porter said in the reference to this that contrary to the hypothesis that "WW2" was a great cause of debt and struggle (it was for other, non-american peoples), it propelled US GDP to the top of the world.

This is no doubt true and indeed it may be a few years before China succeed in replacing America as the world's richest country in absolute terms, it has only been three years since it was subjugated in GDP (PPP) terms.

However, what first got me to formulate my hypothesis, was my noting that with Muslim economies, Middle Eastern economies, war victories, they managed to grow more in GDP than other countries or than they themselves had done in the past.

Afghanistan in 2009 (20%) was the top of the list of GDP (PPP) growth rate. Foreign forces all but left, were expelled from that country around that time, 2010-11. Iraq (10%) is the fastest growing economy last year, again US suffering a war that could last and in so doing may well drag them and their hard power down once and for all.

Clearly for US, all war is good for them, whether they win or lose. This is the basis for the taxonomic classification of US as iniquitous and substitutive. Because war creates the economic climate for US enterprise and the debt due to war accrues. For Muslim countries however the effect is in reverse, war means an extroverted economy and more exporting to foreign fields. Debt economics however causes war.

In America, war is eponymous with economics, war is eponymous to debt. In Muslim economies, export growth has led to war and debt too. There are clearly two separate stories here. Either a complicated web of financial transactions witnessed by the audit trail (the money trail) of the military-industrial complex in the US or the religiously based economics, first the growth of scale economics where substitution effect fails and is therefore growth as purification, ultimately ending in Allah waging war with greedy landowner classes.

However this tale of two cities where iniquity is being poured into us Muslims is not all that there is to tell. The picture is incomplete. The missing link here is communism and megadeth. Without understanding the trap of totalitarianist communism, described by Peter Drucker as the end of economic man, we will see only a flow from USA to Islam, when there is in reality a flow from Islam to USA, with a huge, historical, genocidal reality that many have failed to, and will continue to fail to understand, much to the detriment of our species' welfare; in the middle: The rise of communism in the last hundred years. Unlike other totally barbaric, genocidal forms that have arisen in the "American century", communism is the stepping stone by which we, as Muslims in the west and the rest here, can understand Islam as a middle path, a middle road as opposed to a middle-of-the-road economy. A balancing of two extremes, the two extremes of capitalism-communism.

Islamic economics means mixed economics. The Islamic economy should be and is, a mixed economy. And a growth economy, both human growth and economic growth. Both spiritual and personal growth.

If possible, our two hypotheses are restated here; that Americans themselves are obsessed with the nourishment of war, and that Islam has led to war, of course Russia's revolution is a hundred years old, and Pakistan and India are 70 years old, so we can conclude that between the west and eventual ascension of Islamic ethics is the knowledge that communism is megawar if not the social stage itself.

It is similar to the conspiracy theory of the Jewish Holocaust. Megamurder was an appeal to the conscience of Europe particularly Britain that Israel should be created. Indeed the occupation of Palestine was based on the threat of the Jews to commit suicide or to impose megawar (called world war) repeatedly. The replacement of US economic hegemony is by China, a communist country and since the world wars, there has been permanent US war, perpetual US war, cold war, global war, nuclear war, every type of evil belligerency. This is not the fault of Islam nor the fault of Muslims, and although it is Judaism which is the totalitarian cause of it and communism which is the vehicle of that totalitarianism, people are blinded to the truth.

Nevertheless, the truth will out, the good will out, and the third way, Islam, and its associated economic system, the implied economic system of Islam, otherwise called Islamic economics will eventually emerge.

8. Scale and substitutive economies

If we take GDP figures, the fact that they consist of two figures means you take the gross output of an economy or national output and divide by the size of the country's population. 'if we take the national output and divide by the gross figure we get the megarete, one being the country having a one billion size population, larger being less and smaller being more.

If we take the per capita output and divide by population size again we get the rate of conversion of national output by people.

Therefore we have, quite apart from gross national income (or GDP as it is termed) three new figures: the “per capita”, “the megarate” and the rate of conversion. If we look at the per capita figure as a more relevant ratio, or even the rate of conversion as more relevant than the megarate, we reach a decisive conclusion: It is more important to look at the people side than the money side.

GDP per capita =

Gross domestic product or Gross national Income (Money)

Population size (people)

Economics should look closer at demographics. This will tell us more about the political animal that man is: The “Tigers” (KSA, UAE, Pakistan and other Muslim nations), the “Elephants” (India and Indonesia) and the “Dragons”, such as China and others.

GDP doesn't stand on its own as one measure. Primary, secondary and my own tertiary methods of ranking world economies, with the topper next to it and approximate date of topping in brackets:

Primary

1. GDP (GNI is equivalent) - USA (1939 European war)
2. GDP (PPP) - China (2014)
3. IGDP- China (1960s)
4. Growth - China (1960s)

Secondary

1. Population size - China
2. GDP per capita - Qatar

Tertiary

Conversion - Qatar

Megarate - India

Megaratio (Per capita is equivalent) - Qatar

Scale economies are those rising on the primary economic measure lists, such as Pakistan, India and China, substitution economies are those falling, such as Western economies generally are. It is noted Japan, EU countries and USA are. all deemed substitutive economies. There is no scale effect in these economies. Nor are there conventional economies of scale in the sense of the globalised economy or the global economy.

With the megarate and conversion rate we can gauge per capita GDP closer as the original GDP per capita figure is obtained by dividing conversion rate (GDP per capita per capita) by megarate:

$$\frac{\frac{a/b}{b}}{\frac{a/b}{a}}$$

where a= GNI and b = population

	GDP	Pop.	Per cap.(USD)	Megarate	Conversion	Megaratio
Pakistan	1	200	5000	5	25	5
India	10	1,400	6000	.6	4	6
China	20	1,300	8000	.4	6	8
Uk	3	60	44000	15	733	44
Usa	19	300	56000	3	187	56

Diagram 8: tertiary ratios for GDP

This gives the two constituent parts of GDP per capita and how the personal and national wealth of humanity can be improved by addressing the economies of scale which cause it.

8. The even keel

The immigration tipping point and the even keel

According to my own calculations, ignoring the desire for reparation for colonialism, and all other migration from other religions and demographic factors beyond expectation, by 2070, Britain will be fully Muslim as a country, merely by virtue of net migration, net Muslim migration.

Every year, I calculate, a third of immigration to Britain is from Islamic lands, so that's around 100,000 people are entering UK from abroad. In 50 years, 5 million extra Muslims and in a hundred years from now; add too the doubling and redoubling within 100 years, half of the present population of Britain as we know it is as Muslims continue to land on our shores from countries of Islam. ($5 \times 2 = 10 \times 2 = 40\text{m}$).

Or by 2070, Britain will be $100,000 \times 50 = 5 \text{ million} \times 4$ (reproduction) = 20 million + 10 to 20 million already here = 40 million, a Muslim majority country. By 2100, net Muslim migration will make UK Muslim majority, even if all other factors are constant, such as reproduction rate variation. The picture painted in the above figures is in fact not unlikely although probably not purely because of quite so much immigration and reproduction. What with atheism on the take, an absolute Muslim majority is sooner than we think, but a relative majority is right around the corner.

Within our lifetimes, this great Britain, an admixture of Celts and Anglo-Saxons, is now quickly becoming like USA, a melting pot for different cultures, including Islam of Misr, Sham, Hind, Chin, Arab, Persia, Babel and north Africa.

Those of us who are old care the most about this in their hearts as they aren't encultured but the young, engendered with love for humanity are apathetic to the loss of the Isles and their majority to Islam no matter how much they give their vote to right wing extremists.

If immigration is the big “I” word to fight for, Islam, another “I” word is too, then let me tell you something, and I tell you the things, Islam is a far bigger force to reckon with than net Muslim migration. We will be forced in Britain to turn Islamophobia and hate towards us into love and positives for Islam and Muslims. This is the even keel.

The new world order, part of the American dream has materialised into a nightmare bipolar order, nevertheless, the present Muslim British generation are a challenge to king and country! Our children are the pretenders to the British throne!

The problem of the even keel

Instead of the country saying: work, rest and play, we are much more: struggle, preach and pray, which is not necessarily going to tick the right boxes, flick the right switches. Much as something that concerns the next generation is interesting to the old and wise people of the country it doesn't really make the older generation of people vote for the far right extremist parties so it doesn't really concern us.

Jihad, dawah, preaching is a way forward to bring a balance to a country which is learning Islam from foreigners, looking to foreigners to bring Islam to our shores when Islam has long been here. Looking for foreigners to bring the truth to our shores when the truth has long hit our shores. It's now a matter of swimming for shore. The immigrant tipping point has been reached and the ship of judeochristianity is keeling, we are about to sink judeochristianity.

It's a small matter of mobilising our faith and unity as a faith community amongst faith communities. People talk about millions of immigrants coming to Europe. People die after 50 to 100 years. 30 to 40 years ago 90% of the people in the republic of Ireland used to go to a church on a Sunday now that has stopped and I am proud that now we go to a mosque on a Friday. This means the country's religion, Christianity is to die after 50 to 100 years.

The extremism of capitalism-communism

The extremism of capitalism-communism is fought with a transformation and transition into Islam and the praxis of Islam. We will transform capitalism into Islamic democracies and Muslim democracies, we will transit communism away from leading the global economy into Islamic socialism and Muslim socialist countries.

This is not about the death of Christianity, it is about the birth of Islam in Europe. The rebirth of Islam. We have a new language for our dawah and a whole infrastructure for us to use to accommodate our faith and create a sense of accommodation for our faith. This is the revival of Islam, the renaissance of Islam. Jihad and dawah are connected to the revert as opposed to the convert, the born again. This sense of accommodation will bring our deen forward, our religion forward to return to our roots, as primitive roots as heaven. God Almighty who created us, created us as humans perfectly in heaven and that's where we're going.

It is our religious duty to fight oppression and spread Islam, this is neglected in favour of importing Muslims to preach as Imams in our mosques, people to wake us up as we are asleep to our own destiny, like Allah ta Ala gives us life, he ta Ala gives us two lives.

As Muslims we believe the society to be too liberal, too evolved but not too liberal for us to get along with. We believe in liberalism and human progress.

What we don't believe in is the missionary position where the slaves were raped, we were raped as Mamluks! What we don't believe in is the mass genocide we're taught, world wars. Post-war etc when we were megamurdered by them!

All these things were wrong.

What we don't believe in is the people were using mass famine as a weapon of war! What we don't believe in is the use of military weaponry to kill our people by the million and the denial of that in the public realm! What we don't believe in is the holocaust! What we don't believe in is the use of the idea of post-world war at all!

Well then we have to start to believe in this as a personal duty instead of as a national obligation:

We have come to boiling point, no, a melting pot!

World war, post-war, megamurder, megafamine, military weaponry and megawar. Multi-holocausts! We have got to get even! We have got to get this ship to keel!

Three are the institutions which we have to change in the country, indeed when we consider we have come to change the religion of this country:

- The calendar
- The royalty
- The English language

This is a revolutionary change, an institutionalisation of, for example, Ramazan or Lordship or Urdu's use as first language. It can have an effect on our moral compass, if, you go to mosque in Ramazan or you see a Muslim peer or even MP working for you and your corner, or you are speaking Urdu to your child at primary school or whatever.

We can do this if we try, by taking part in Eid properly, or calling for our peers to be given the right to be made nobility and by speaking a pure Urdu.

Anything can get you on your knees but it is Allah subhanahu wa ta Ala who will keep you there. Who will keep you in a position of sajda to Him Azawajal. And that is a move towards prayer, that is a move towards peace, that is a move towards the dissipation of all your worries hitting the floor. Hitting the ground, becoming nothing. And that is a step towards religion. That is the beginning of religion.

In this country, in every country, in any country, there are no borders, there are no bosses in that respect. When you learn that even if there is a therapeutic relationship between you and your Creator, there is a therapeutic relationship between you and the

respect of the religion of the masses, the religion of the class war, and of the masses and the classes and the people below. And that's a positive, and you've turned it around from being a negative into being a positive. You've turned Islamophobia away, war of terror away, War on terror, War on Islam!

You have won! You have turned negatives into positives! You have emerged victorious. The peace warrior has shown that he can hold his peace and save his piece at the same time because there was a struggling, a preaching, there was praying that was in conformity with shariah.

And the even keel may not be like that, it may be a therapeutic prostration to God Almighty to begin with and some prayer and eventually you'll come to La ilaha il Allah, eventually you'll come to din, eventually you'll come to religion, eventually you'll come on the road, and that's for the good, that's for the best for you, that'll bring out the best in you.

9. P-I-C spelling peace

Pak- economics

		Emergence	
		Emerging	Emerged
Planning	Central	Pakistan	China
	Irrational	India	

Diagram 9 - Emergence vs Planning: Present situation of the supergroup

China will probably remain a greater demographic force but a new model is needed meaning India to become, a dar al Islam country to become the world's top economy in three decades time.

Emergence of industry and manufacturing base

The old model needs to be replaced and instead of risk and return we should focus instead on planning and return so that consumers can return to the sub-continent's industry and build a manufacturing base like China.

		Return	
		Reductionist	Wholistic
Planning	Strong	Pakistan (emerging)	China (emerged)
	Weak	India (emergent)	Emergency

Diagram 10 - Pakistan aims to be a top 10 economy of the world by 2047, China No.1 by 2025, India by 2050.

As Muslim nations we have to go beyond models of centrally planned and laissez faire, it's time for us to instigate Islamic economics which means Islamic economies are to conquer.

This is the era of Islam – the dar al harb of the west is reverting to Islam. This is the victory of dar al Islam, India is to be the world's greatest economy. This is the theory and practice of Islamic khilafah.

Islam is a political force to be reckoned with, not only in dar al Islam but throughout the rest of the world too, why? Because of the importance of khilafah, because of the importance of Muslim nations, because of the relevance of dar al Islam countries and because of the potential of non Muslim countries to become dar al Islam. And this is kamiliyat.

Every Muslim nation is governed through centralised power and centralised planning, why then the so-called “centrally-planned” economies? Every Muslim nation has trade and is allowed it to flourish and grow in its’ environment, indeed the roots of business are nourished, then why the so-called “free world”?

The fact is the west has always been at war and will always remain at war with the world. If Jews suffered a holocaust in the third

reich, we have, as Muslims suffered a multi-holocaust by the fourth reich, in our own home lands, the Holy Lands in the Middle East.

The good thing to emerge from this is a multi-polar world where the rule of the few over the many is over. This is through the financial situation of human beings improving by not putting their lives into financial risk. The cause of the rich countries to take on debt can be seen as to do with the theft of the very basics of their culture and resources.

This is how the eventual thing will play out:

		Return	
		Reductionist	Wholistic
Planning	Strong	Pakistan	India
	Weak	China	

Diagram 11 - India and China: trading places

By thirty years time, the supergroup will see Pakistan remain a deeply religious and powerful country. Also, a new superpower, India, will replace the old superpower, China. UK, USA, France, Germany will have begun to assume the role of divisive materialists, weak and petty, not even in the picture of GDP nor per capita GDP.

10. Absolute Muslim Majority

Muslim vs Christian/atheist

Diagram 12: Religion being part Muslim, part Christian, part Atheist.

The fall of UK is taking place and over the next few decades we will liberate an, at present, former white, a former church attending people to become BME communities who also attend mosque on Fridays; to being a majority Muslim peoples in our own right, albeit largely coloured and largely immigrant historically.

The eventual creation of dar al Islam being a Muslim majority in Londonistan (UK) is calculated by Oxford University to be 2066. Professor David Coleman, professor of demography has calculated the end of Britain and Britons.

The irony of this is not William the Norman king of England, but rather it is that for the last 20 or 30 years, the UK has been at the spearhead of a bloody assault on Muslim lands in the aggressive wars of Iraq, Syria, Afghanistan etc.

The irony of labour and capital or *sarmaya o mehnat* is that they are one after the other, should they put down their guns and bombs, the largely conventional arsenal as opposed to nuclear arsenal, and start using nukes, they themselves, USA and the former-USSR would be destroyed by the million.

Our consultative nature taught them democracy, our free zakat-giving community spirit taught them socialism and communism, but their money capitalism is from the enemies of Islam. If the ebb of Christianity is blamed for the failings of capitalism-communism then the only thing wrong with that is that on the surface it appears the other way round. It is the collapse of capitalism that is causing the masses to flock away from Christianity.

If I object to the rod of Cain being used too often against good Muslims, I also object to the money capitalist of Islamically illegal finance and both these evils must be fought. I object to insurance, life assurance, money system, credit system, savings accounts and mortgages. As well as to the arms race!

Britain today, with London as a representative sample:

	Muslim %	Christian %
ADHERENTS RATE	20%	40%
NUMBER OF CONGREGANTS	2 MILLION	1 MILLION
RATE OF CONGREGANTS OR ADHERENT	40%	10%
RATE OF CONGREGATION	2%	1%

Diagram 13 - Although we are 20 to 40 we do much better here as per going to a place of worship, measured by weekly congregations.

By around 2050 London will have an absolute Muslim majority, although as a whole Britain is due for the 2071 census to reveal an absolute Muslim majority.

Religion in London and/or Londonistan:

	Muslim	Christian
2010	1	4
2020	2	4
2030	3	3
2040	4	3
2050	5	2

Diagram 14: Millions of Muslims and Christians (Londoners)

This shows a relative Muslim majority for 2040, indeed an absolute majority unless the population grows. A 2050 majority anyway.

Religion in London as a sample of UK, shows millions of people going to Mosque not church. London as a sample of UK shows by the next census two years from now, in 2020, two millions will be going to Mosque, compared to one to church.

UK religious attendance:

	Muslim	Christian
2010	1	1
2020	2	1
2030	3	0
2040	4	0
2050	5	0

Diagram 15 - Millions of people going to Mosque not church of england in UK

By 2030, no millions will go to any church in London. By 2040 there will be more Muslim Londoners than Christian. This is Londonistan as per the second table above.

11. Land of Islam

Very often an economic agenda biases our social and moral lives, that so often the human behaviour one way or another is often not lacking in backing of financial incentive behind a cloak of socio-cultural or even moral or ethical reason.

This utilitarianisation of our ethics, something I cannot accept to be distinct from revelatory ethics or Divine revelatory ethics, is often associated with the system of disbelief and false witness.

In my seminal work economics, I lay out the theory of capital obsolescence, that, in Malcolm X's terminology, the white man taught the black man to hate everything about his self, stole his religion, language and culture, changed his name and even, I say, taught us to hate our wealth.

This is the basis of the collapse today, of the capitalist system. People are recognising and realising that if you are Christian, whether people accept you are extremists or not, a lot of the so-called “new testament” writings are of an extremist nature and fail to provide adequate explanations and analyses of principled economic thinking. Also they are theologically and biographically unsound.

The point I make here is no small one. Much of what we are taught in life, from schooling to a whole international relevance is that western thinking that implies British constitutional monarchy or parliamentary monarchy is good. However the capitalist or the democratist inside of that system is at clash with the communist or socialist in other parts of the world, eg. China where economic growth outweighs western economies’ growth and has done now for 50 years.

What is really happening here is that the schisms or schizms of western economics, properly termed materialist economics are unwittingly in contempt of their heinous loathing of each others’ material historicism.

Historical materialism and money materialism are the two forms of capital and labour which show how within every facet of their thinking; in politics, in the science of psychology, in management, they are nothing but the love of hating each others’ principles of materialist evil and therefore hating their own wealth.

It manifests in social science with the scientific management vs human relations school (really capital vs labour), it rears it’s ugly head in the mark of Cain of capitalism-communism itself (Islamophobia), it shows itself as a facet of Judeo-christianism (needing a new replacement theology or philosophy), it comes out in psychology (the id and ego), nowhere is it unknown.

X asks the question, “who taught you to hate?” rephrased this is “who taught you to hate your wealth?”. The answer is not any of the above, not Jesus, not the bible, schools of management or psychology, nor is it political. The answer is all of the above. The underlying systems of the west are corrupt.

As for my work in the classification and taxonomy of economies of scale and substitution, these are with regard to their being a clear relationship (in scale economies) of people, social existence with economic power and proportionality thereof.

So scale economies are big economies, Pakistan India and China, whereas substitution economies are having a diminishing return and are deemed small. Examples of these non- marginal economies are the G7.

Chapter 3 - Land of Islam

Islamic sociology as social science

For our society to be a just one, upon the behaving of any unjust act, the sinner will undertake a process of regret and self-rectification or there will be outside encouragement in the process of crime and punishment. Either way, whether through the mechanism of conscience or the hand of the law, the wrong must be put right.

However given the latter in particular, the sincerity of intention of the latter (legal punishments) depends on the former, and on the sincerity of it. It would seem a rational reason for society to be moral would instead be a more reasoned and logically rational one than the assumption of the moral or ethical hand. So there is little reason for most people to change their mind regarding their own action and to right for someone else, a wrong that they themselves have committed, religiously. It would either be because of family or peer pressure or for financial security or the feeling of financial security. The function of “Londonistan” is not to convince the people our action must be founded in religion and to gain power as Muslims on that basis, rather it is to do the exact opposite. It is to provide the sort of template that is, although incapable of liberating UK and USA, still encourages people to see the infinity of possibility that exists in the UK and USA, the west in general and the rest of the non-Islamic world. People must know inside that they are capable of conquering the west only then can Muslims see that capability and capacity.

Before that a plan must be drawn. We must move through a process of Muslim dawah, with Muslim English newspapers and newspaper columns, through the praxes of ibadah, to caliphate.

The illusion of wealth and the fall of the west

There exist in the world, two views as to the rise and fall of economies such as USA. Firstly, that it is a natural consequence of post-industrial modernity, and now, a second view that American

economic power existed due to the ease of finding slaves and filling them on ships to basically rob third parties of their land. The contention of arrogant power is not just that slaves built the American cities, nor that they (the “white men”) robbed Native Americans in the process, but due to the advanced schizophrenia of the west, in opposition to the Divine religion of Islam, slaves were to go to America, without anyone putting up any resistance. Who would have done this? Britain (and the European states) who fought in the war of independence.

Another contention of arrogant power is that modernity as it exists and as we know it today, exists purely as a reaction to, and development of industrial rapine, whereby British empire was created in far-away places from the British Isles, specifically, and more generally, the developmental process of industrialisation across continental Europe.

We often make the mistake that the pride and honour of western men comes from their power in the world when really, it is quite the opposite if you would just look at the factors of production and our relationship to them. The work of arrogant power is to posit an unexceptional and unaccepted idea. That it is the arrogance of these slave-drivers and those around them, that has created their power and has led to it's demise in this world.

Materialism

The great enemy of materialism and materialistic systems, is not they favour matter but rather that what matters is that a new religio-spiritual system will turn around wealth as a socio-economic driver and refind resources, different forms of capital, as a cause for economic progress and development. Capital must find investment and necessity must mother invention. As the ancient Greek philosopher, Plato 1 said, necessity is the mother of invention (and will one day soon prove itself to be victorious over materialistic greed).

The growth of economic systems

Islam- Nationalism eg. India

Communism- Mercantilism eg. China
Social democracy- Modernisation eg. Usa
Capitalism- Industrialisation eg. GB

In today's world, a change is taking place, returning success. Absolute (Adam Smith), comparative (David Ricardo) and competitive (Michael Porter) advantage models are being replaced, through an idea of the exploitative nature of "surplus value", to a new model which seeks instead to minimise advantage, by not being...

1. The best in the game (ie capitalist)
2. Better than our competitors (ie economic theory)
3. Better than everyone else (as in the communist world).

Indeed these are the three failings that have led us this far and will ultimately see us beyond this into a concept of good or khair or ihsan.

1. Capitalism and industrialisation – trying to be the best in the world
2. Democracy and modernisation (globalisation)– trying to go one better than our neighbours
3. Communism – trying too hard, even, we will see soon during a brief mercantile phase of Chinese world economic domination, to be the best of all those who are better

We are now left with two reasons for why Islam is good and the other systems are bad:

1. They reflect the arrogance of materialist forms of living as opposed to the humility and simplicity of a pure Islam.
2. They are in a matrix with capitalism-communism, which reflect an untrue notion of better and best for the supposed good of Islam. This is in line with the surplus value or zakat value concept.

Think of the example of industrial rents in the farming communities of rural China today. They will pay, as farmers tilling the land, rent to the landowners. At the same time they may give some money away to someone in the family, they may pay tax.

They will certainly pay a premium on what the landowner is actually paying up for owning the land. If they make a profit on the farm after expenses, tax and any possible zakat, it is going to him. Why? No matter how we look at it, any combination of expenses, savings, leisure costs, profit, tax, surplus value will always see the landowner taking his surplus and government robbing theirs too. Capitalism allows for things to be based purely on money terms. Indeed Communism allows for things like world wars to take place, but it is capitalism which ultimately makes a foundation for them and starts them.

The “better” part shows how charitability of Islam and even zakat, is eaten up by communism and the arrogant. The “best” part shows how ultimately even this is consumed, as is the surplus value, by the taxing capitalism and the powers that be.

The psychology of arrogance

Theorem: If surplus value comes from zakat then tax comes from surplus value.

If this theorem is standing as correct then it is very much like working backwards or using the top-down idea of saying that if a government follows Islam, so should the communities that live within the rule of that government or at least that if a company is governed by Islamic principles, so should the chief stakeholders of the company adhere to the Islamic faith’s belief and practice.

The politics of power and the demise of the superpower

At heart is the idea that the old superpowers are being exposed as no longer nurturing the value creation they once used to, and so are the new “Arrogant powers”. They themselves become intermediaries for trade, instead of partners in their own right, and ultimately dominant partners in economic partnership internationally.

War is the health of the state, if the States are without war they will decline. However war is the disease of the civilisation. If Pakistan, India or China go to war they will fail to cause America to decline.

Strategic development

Emergent economies such as Pakistan, India and Indonesia are part of the developing world, with largely emergent strategic developmental systems and emergent strategies. But what if they became a bastion of religion and tradition? A threat to the world order, a new world order?

The example of the superpower

Materialism's three powers, Gb, Usa and China (the present largest economy of the world by GDP PPP) are to be replaced by the Islamic superpower, in the Pak-subcontinent. Inshallah.

Perfect co-operation or The Perfect Command of Allah subhanahu wa ta Ala

Instead of blindly following the economic system of perfect competition and the economic system of the command economy, at the economic level, and at the political level suffering democracy and socialism; we should unlearn capitalism and communism and learn or relearn the Islamic model (here termed one of perfect cooperation or The Perfect Command of God Almighty). This would bring in the added element of harmony at the governmental level. This means we have taken our theorem (that if surplus value comes from zakat then tax comes from surplus value), and applied it. Islamically, zakat (government aid instead of war) can remove the extremism of communism (and specifically the political system of socialism) through abolishing the surplus value; and zakat at the ground level or the grassroots level can remove the extremism or jehel of capitalism (and the democratic governments too). The problem of tax avoidance and the payment of reparations are examples of public benefits that will occur automatically for Muslims.

1. Pakistan economics

When a common person acts for his/her community, he/she does so before any interest of his/herself. He/she serves the society and then his/her own self. For example if a person is to talk of monetary dealings of an average person in everyday life, they may hold cash

for themselves or a bank account will be kept for their own person in their own name.

What drives someone to act for the common good is deemed a “social” force, beyond this we could call it “altruism”. Here it may be life-saving or life- changing. Much of economic theory assumes a guarded self-interest. The only real psychology in economic theory is selfishness. Given my explanation here that social forces and altruisms are such that common people confuse them for social and psychological motivations, an explanation can be forwarded for why capitalism-communism is a sense of deceit, a false-consciousness, a falsity and a fallacy which has confused causal altruism with self-truism or a-truism.

A false prophet or placebo group exists in the science and indeed experiment of economics. Capitalism-communism is for this period in history at war with Islam. Both accuse each other of aggression, indeed totalitarianism. It is the defence of Islam, that it or we are indeed not terrorists that can save us from this war. But why would the common westerner falsely accuse Muslims of terror? Because it is projection of their own truism (that they at some level admit to world wars in their history) or even altruism (that they admit at some level they are just lying to themselves’ or they are just mixed up.

So the lay economist in the European countries says to himself, “I’ll help the granny cross the street”, he acts socially and personally, he feels out of control with his self and his behaviour. Should he believe in God and God’s last Messenger (PBUH), his conscience will tell him, quite correctly, we act quite the other way round, like a materialist would with his money.

Naturally, God, or pleasing God is our first and primary consideration and following the sunnah to be kind is important too. Truly this is something we have heard talk of from people of non-Muslim countries but we don’t really see it in practice: the personal, becoming social, being communal, for the wider ecology, being biological.

There is, in civil society, a need for balance of people having government and obeying the laws of governance, and not being in a situation where their people's governance dictated their civil behaviour. The two extremes of these situations are:

1. When we act for the community civilly (ie in a civilised manner)
2. When we act for the interests of our own vested interests of our land etc.

The two ex-countries or ex-nations (which Islam or the Islamic nation has now incorporated into the Muslim Ummah) are Ussr (extremist communists) and Usa (extremist capitalists).

The politics and apolitical nature of capitalism-communism is depleted by moderate mixed economies. They who follow either being apolitical as in the capitalists, or being political as in the communists are by definition extremists. They seek either a state of command economy (political governance of the people) or a laissez-faire economy (an apolitical, platitude of peoples views on economic issues or non-governance).

Islam is the perfect balance between both types of extremes: government and it's antinomy. I'm saying Islam is therefore where we have civilisation and community, as well as worldly interests. Islam has replaced the former Ussr and communist bloc, and will inshallah begin to replace (liberate) Usa through conquest in the next generation:

Hegelian dialectics

Action: Government through antiquity

Solution: Iniquity of no government

Reaction: Muslims taking over, overtaking (all lands are going to the Muslims)

Thesis: Prophetic way of living

Antithesis: Kingship

Synergy: (Untelevised) Islamic revolution

Pakistan vs USA

We in the west MUST start to understand and it is vital for the life of our children, the children of our country/ countries, that Islam is a way of life, deen, and that it is allowing us to attend our common affairs, to act mannerly, to be civilly grounded, as well as to maintain ourselves economically, to keep us working and gives us as a land or a people of a land, a mode of subsistence. In order to do this we MUST stop saying, we are people of the book too, we, as Muslims are people of our HOLY book. We MUST surrender all our problems and affairs to God recognising that governance is from Him (Almighty) and returns to Him Almighty only.

As Judeo-christianity dies out and the supply curve that fits and creates the actual factual mechanism for people to live (purchasing power or call it what you will) maintains both its' dignity (no excess cost) and integrity (not too much or too over the top), or its' quantity and quality we see extremism can be met by making Jews and Christians into Muslims.

With mass conversions into the Islamic faith and with countries being more mosque-going, the chart would imply the need to go to war would subside as would the feeling of oppression by the agenda-filled interest groups, the fifth column.

The balance argument has been made that neither capitalism nor communism have long-term reality because they are theoretical economics only. Extremism by definition. They have no history, nor any future whereas Islam has both. Indeed in the Muslim nation is the greatest of all nations at present already.

Another argument is to do with, if you like, Islam itself (the supply curve). Can Muslims both do enough for our faith and can we as believers abstain from going too far in this endeavour?

This is a question of our unity as an Ummah. How do we go about to deal with the people of the book? What are our systems of worship, our basic and fundamental issues as well as complicated non-fundamental ones?

The liberating libido of the west (London considered as UK and USA), the good ego of towns such as New York, city of sodomy, is in fact a full blown placebo. The two economies of capitalism-communism, showing the idea of government related through antiquity by Prophets (PBUT) and made real by their way of life and its antinomy. USA and USSR are on their way over the last 30 years to oblivion.

Jesus talked in the Bible of two masters, God and mammon. Here I will compare this to taking medicine for health and taking a placebo, these are like following the Sunnah and the false consciousness of false prophets. The extremisms of communism and then capitalism create the terrorist ideologies of socialism and democracy respectively. But does not socialism make republicanism and democracy make liberalism etc etc etc??? In other words aren't all these "isms" a self-perpetuating evil?

Further than all of these evil "isms" is Islam and if we can see it here as amidst all of the extremist ideologies maybe all can recognise it as a pure state, one that we start with and yet have corrupted over the years into these other ways.

"No one can serve two masters. Either you will hate the one and love the other, or you will be devoted to the one and despise the other. You cannot serve both God and money." Matthew 6:24 New International Version (Gospel, Bible, Jesus's words)

Surely if Jesus (upon whom be peace) recognised this evil (capitalism- communism) 2000 years ago, we should now too! Either we find what Allah's Prophets and Messengers called towards or we serve dunya, money etc. The definition of the Deen of Islam is it is about balancing the transaction of worship, concerned with the rights of, and duties to God exclusively of all else (even Prophets); and within that transaction, of the Creator's creation, including all humanity, all living things and so on. This differentiates Islam as a religion from Judeo-Christianity. Islam believes in God and His Prophets. Judeo-christianity, in his Prophet and all is then relative to that.

How Pakistan is a potential superpower (a force for the good)

The US is not even really a country historically at all, as it has no distinct language, culture nor any religion specific to it. Whereas Pakistan; what do Sikhism, Buddhism and Hinduism say about Pakistan? Economic, military and political superiority is not all the G7's. Economic, social and political relevance belongs to the emerging markets and to the developing or third world too:

1. Economy-

Pakistan has a strong agricultural economy and ties with others in the second and first worlds. GDP per capita may be lower, but GDP (PPP) is much higher, now in trillions, than all except large powers. Pakistan has a growing economy, sometimes 5-10%, unseen in the west. War suits the west, it doesn't suit us Eastern countries as it is wrong. Pakistan is following export-led-growth system successfully. There is principled equality.

2. Surrounding support

Competitors in the eyes of the world, China (world economic super power) and India (upcoming world economic super power) are the friends of Pakistan and more than that.

3. Religion

The nation is an Islamic republic, naturally, it is to be expected to be run by fatawa, given such a large country.

4. Investment

Foreign investment in Pakistan will mean none in the enemies as the West is in decline. Their money will eventually come to Pakistan. This is not just a dream of super power, but vision, foresight, plan, strategy for now.

5. Occupation

Freedom from within. Kashmir is the throat of Pakistan. Liberation of outside countries too. UK and USA will too be Little Pakistan soon.

6. Conquest

Liberation of outside countries too. UK and USA will too be Little Pakistan soon.

The socio-political ambition of such a vast country by 2050, with only India and China greater than it, makes an obvious contender for world super power given the intrinsic debt economy trap of India and China that they may follow USA or UK. In other words they may have assets too but for them liabilities are always going to be greater.

To conclude, USA is a baby, if US or UK were great like Pakistan, could they produce just one Guru, Prabhu or Buddha?

Extremism- It is the other way round, capitalism-communism causes it. Not taqleed of Imams of Islam, certainly not ittiba and tolerance.

Terrorism- Socialism and democracy are the real terrors, not China or India, nor Pakistan.

People mention USA, but before USA was Britain, but you know Anglo- American management model is soon to be replaced by the Pakistan management model, that is why Pakistan is the next potential super power. After China and India it will have the greatest population. You see the world recognises up to four superpowers at one time (the supergroup), and with the ascendancy of Pakistan is the fall of "London" as we call UK/ USA.

2. Capitalism-communism, extremism

It is not American peoples but engendered interest groups who are American withan agenda to rape and kill. You shouldn't go to a bank when they have clearly no desire to do good to you, indeed they want to use your money to rape and kill. The proof? The military industrial complex being the money trail. The military industrial complex is evil, so too is the money trail which is via the financial system.

The depression of 2007-2015 is denied to hide the number of wars waged by the US army. Why was there a depression? For 20-30

years, it is China not America which is making the great leaps and bounds of the economic world. Yet no-one knows this. The fastest growing economy since 1985 (30 years). The largest economy (GDP (PPP)) since 2014. Coming up to 5 times the size of US for size (in terms of people and manpower). The 38 year old economic reforms known as Dengism are clearly the greatest set of economic reforms man or history has ever witnessed. Why then is it not publicly known?

Because they directly not only turn or return China to being the world's superpower, top economy and political power, but they relegate US power and the Angloamerican management model to a second-rate, second place ideology, no longer relevant to real life.

When the theoretical and objective doctrine or approach to existing economic theory and conditions is made, we must see the social scientist as a child who is asking itself what does it want from it's life, and we are the parent of that child to know why it answers the question in the particular way it does so, and the reason behind it's type of answer. If we know the question the child asks itself, or the type of question it asks of itself, we can have a clear insight into how it is that a normative or positive approach is taken towards the science of economic endeavour. Thus pure economics is answering the question of:

1. What does the being want from it's behaviour?
2. What kind of behaviour would we like from it?

The next stage is to address what type of social science we are concerned with. Economics, has been defined as making choices on the allocation of resources, in this way if we can show how governments, firms...down to the smallest of individuals operate according to a certain law, we can generalise upwards, and then have the power of specification and prediction of the unknown from there.

The child then can have it's normative economic utility and it's positive (question 1) economic utility. Or, in other words, the economic question is first and foremost amatter of individual AND social needs. What, however are the present, democratic, socialist

etc, whatever political system they may be; capitalism-communism, in terms of ECONOMIC SYSTEMS?

Clearly, capitalism-communism are theoretical economic systems. However, since they are purely theoretical systems, I will contend they are impure and impious economic systems without practical, or individual or social truth.

Capitalism is a stretch on the individual part of what the baby wants. Communism is not necessarily what we want of “the child” rather it is what is generally wanted of a child, the social utility of economic behaviour.

These are therefore both extremist economic systems, no wonder state terrorism sits so comfortably with them, and so unconscionably with others.

Notice how we have, in defining capitalism-communism as extremism, created a “middle road”, al Iqtisad, or “economic” thought. Indeed it is as if we are being adult about our resource allocation. Neither do we flake out of parenthood, governance, statehood, national control etc. (as does capitalism) and neither do we fall into the hole of excess of the same to the neglect of individual rights (as does communism).

Capitalism-communism, then is related to rights and obligations of human beings being ignored, jahilliyah. How? Through an attempt to serve, in capitalism, individual rights; in communism, to fulfil social obligations without understanding all muamalaat are part of ibadaat. All social or economic or political action, even economic action, as we shall see later, is only half of the inner, spiritual dimension, which includes aqeeda, ibadaat and rasumaat. Indeed these rights and obligations are: Exaggerated, greedy, serving Satan, utilitarian philosophically, self-serving and biased, innately racist, xenophobic and bigoted.

They lack, by definition of their extremism: Adult temperance, adaptability, compassion and Divine wisdom, moderation and tolerance.

So, capitalism-communism is characteristically, caricatured and a cause of terrorism, state terrorism. Why? Simply because it is ungodly and unclean.

Capitalism permits usury-based transactions and even the taking of slaves and lands from other peoples, which are outlawed things. Communism says landowners collect rent from their property being let and this is, they say lawful.

Capitalism-communism's terrorism

1. Slavery
2. Rapine of land, eg. USA
3. Riba and gharar-based wealth
4. Rent for land as above or on it's own.

The fourth type of terrorism above shows how if capitalism-communist extremism is not curbed, it grows. This is the problem of capitalism, an irreligious economic form; it leads to the evil of communism. In the end, the baby learns to please the parent it has to listen to what the parent or father is saying he wants.

Indeed, if capitalism-communism represent rights and obligations in normative economics, it is the individual and social we are concerned with. If these can be individual as familial and individual baby; and social baby doing as per father, as social, in between is the firm or corporate reality, with businesses behind it. Islam, then is a way of mediation, between use of land to let, money systems, gold, mutual trusts etc, rule of countries and power structures and struggles. It is as if the baby has developed a super-ego, a conscious or a conscience. He/she knows how to get simultaneously what he likes (wants) and his father or mother says he/she should like (often needs).

If capitalism-communism is a form of extremism, democratic states and socialist states are like stasi-states, forms of terrorist states. Why? Simply because they are caused by extremism one way or another.

Given our division of capitalism-communism into individual and social, positive and normative, child and parent, theoretical and

pure; we can now see capitalism-communism extremism as it is in the light of how capitalism has terror in theory, whereas communism is pure terror. Capitalism has *riba* or slavery or land-grabbing, communism has a system of rent, where you pay for all of the above as victim; worker.

Capitalists argue capitalism is practical. No, it, like communism does not exist in reality but even democracies talk of the vices of free markets and so on. For everything in a market to be free, even the market would be in theory only. Similarly, democracy no one really has any power or control, it is not even the government here in UK, for example, the form of the so-called “fount of honour”, the Queen, the sovereign and figurehead.

In communism or socialism, it is the watered down form, the Iron law of wages, for example is given tax relief and subsidised by the government, however it is still determined by the forces above or the powers above.

The political system of capitalism, democracy is designed on passification of the peoples and a feeling of powerlessness en masse. Voicelessness marks their thinking that the oppression at their own hands by the clergy, the political and ruling classes, is better than oppression from nearer sources.

The political system of communism is socialism. It is scientifically informed by Marx, a Jew from Germany. It is therefore antichristian and pro- Islamophobic, as well as being pro-terrorist. Antichristian because it doesn't accept Biblical teachings, for example against rental interest; pro- Islamophobic, because it doesn't accept the Divine code of mercy and compassion; and pro-terrorist because it is innately authoritarian by definition and a dictatorial governance in nature.

The growth of megasystems

The U.S. was voted the biggest threat to world peace (due to world and global wars) by far, garnering 24 percent of the vote in a Gallup poll. Pakistan was a very distant second with 8 percent, followed by China (6 percent) and Afghanistan (5 percent).

The peaceable economies have acknowledged a depression from 2007 as growth has fallen from 13 % to slightly lower levels.

The supergroup spells peace:

Pakistan- The leading power (leader)

India- The staying power (Stamina)

China- The driving power (Change)

Western powers are then the superpower in the sense as they don't have any power, they are too oppressed by their parents. The supergroup are on average, one billion people-strong in their demography. So three Americas each or twenty Great Britains each in people power:

Pakistan: 20 crores (2015)

India: 130 crores (2015)

China: 140 crores (2016)

Average: 97 (almost 100 crores)

There is clearly a battle in which various socio-economic forces play out amongst humanity's civilisations and cultures and come to major powers or superpowers or megapowers that has been recognised. China has been termed the civilisation-state, for its sheer size and variety of cultures, whereas other major powers will remain nations countries or states for now. Given India fits the bill of a civilisation in its own right, Pakistan is modernity's version of the ideal state, country or nation. In mercantilism or post-mercantilism it may pose the alternative to the hegemonic democratic state, as it is a republic.

Even in Europe today, Spain represents the potential of the Islamic state and Greece, the republic, leaving the European developments of Nazism (a Rhinean development) and Fascism (a Roman one). Uk , Usa and the rest of the European union could in future seek to do the best for their people by trying to do the best for Islam, for the inclusion of the Muslim peoples and not by operating a policy of marginalisation thereof.

Industrialisation

Industrialisation was an unjust process and one that ingrained injustice into the lives of many, as history testifies. It is impossible to deny this for those of us who have read the history books. As the end of the last chapter shows, in any battle with the US, Islamic nations have seen their enemy as, given the split of Yugoslavia ends the Eastern bloc's development, not a war with the west but a fight to defeat its enemies once and for all; and one in which the two major world superpowers are naturally allied to Islam and Islamic nations. India and China are not only neighbours and occupier neighbours for Pakistan but they are the only countries bigger than the States themselves.

The political onus has been set, in the creation of many Balkan or Caucasian Islamic states, for the destruction of the orthodoxy of Christianity and its replacement with militant, political and indeed intellectual Islam. Now is the task of demolishing the enemies of Islam in a type of race for the top. If we are to fight and pray for the liberation of our lands from occupation, then surely the fight and prayer for liberation and freedom from servitude of un-Islamic economic and political forms is natural too.

3. New Economics

We have seen the emergence as much as Pakistan, India, China and Indonesia, these great world economies which have more promise, more potential than actual domination and subjugation of other nations in the fact that they have a higher growth rate and a higher growth, less debt to equity, less borrowing than so-called developed world economies although they are smaller economies as they have lower GDP. Lower GDP when you don't take into account the PPP because there's a lot of cities there. The west comprises mainly of one city, London because Russia has been destroyed by the Taliban, inshallah we, the Muslims have destroyed USSR now we will destroy the USA. When we look at that as a strategy, look at that as a mission to annihilate the "great satan", a very noble cause, it is a very noble aim to take a superpower, an egoic power, to take the deadly, the death power and to bring it forward into...and to take the idiot power and to make something of it from a mere 5% or 10% nation of the American people,

obviously it takes a lot of forward planning, it takes a lot of risky....you know as much as we face the risk when we stand up and confront the injustice and tyranny of having to pick up guns, we face the risk of people trying to kill us as well.

That's why we are resorting to violence, that's why we are angry, that's why we are saying look at the black power movement has worked before now it's time for the Pak-power movement to work as well inshallah, and nationalism is the one thing that can bring up India above China, not above America because China is already above America, we have already destroyed America, Alhumdulillah.

The triad of America, Europe and Japan bows before us, the north they used to talk about as a matter of the changing of the guard, it is not as I would look at it as but people talk of catching up, it's not catching up! It's not catching up when Europe is subjugated before Islam and Japan is subjugated before China, and America is all that is left in top 30 economies of the world because of the peace powers, peaceable powers. And that is purely thanks to Allah, this is purely thanks to the efforts of people to say we've had enough of these white power hypocrites, we've had enough of the British and American and Israelis telling us what to do. We've had enough of people claiming they're Christian which is that they're nicer people, when really they should be fearing Allah. They should be fearing God. They should be loving God not having sex with little boys and claiming that their priests.

You know what I mean, people say these priests, they actually have sex with little boys as part of their satanic rituals. I have no doubt that they do these things because I have seen it, I've seen ethnic cleansing. I have faced that thing first hand. People my age they used to drag them off and rape them until they gave babies that were Christian. So don't talk to me about what is the enemy facing us. Inshallah from 5% to 10% nation to black power to Pak-power movement (one which incorporates all of the non-allied movement to a if-you- like, a non-globalised, a non-worldist agenda, a non-dunyawi agenda, a mazhabi agenda, a deeni agenda, a diyanatdar agenda or a theocentric agenda; one that says it's all very good but the south isn't just catching up, the south is going to dominate and subjugate other nations.)

You may say China does not qualify as the south, then you will have to say India does not qualify as the south then you will have to say Indonesia does not qualify as the south: so you talk lies to us but we will not listen because at the end of the day, it's not catching up, it's defeating the enemy, and when you want to defeat the enemy you will find they bring guns and bombs to your yard and in that case you take the attack to them, you take the military, whatever military way you have, you take it and you kill them, you get militant. You know there's a struggle, there's a power struggle there that's what we are saying. We talk of the Pak-power, that's not exempt from the Pak-power struggle.

There is now fear of a Pak planet, because we don't fear a non-triad country or a nonwarcentric country. They don't fear any country which is not America or, you know Europe, America or Japan. But they will learn to, they will come to fear that once they have been replaced not just annihilated, but replaced really like they talk of the destiny of Israel of their own hegemony was to bring the replacement theologically of Israel. That's nonsense, they have no right! They're on a mission with no permission, causing holocausts and causing Nazism and nuclear war just because they're co-operating with Jews, They're on a mission with no permission, this Nazism, and look at Christianity- it is a mad, bad and dangerous to know phenomena. It's not that they're just fascists if you go to the Americas you will find they're just fascists, the Catholics, so if you exclude the Catholics then yes, America's sell-by-date is only 30 to 40 years, yes if you exclude the Catholics, the Muslims will inshallah dominate and subjugate them. We will replace; annihilate, replace and liberate.

Is capitalism-communism extremism?

The nature of extremism in the economic sense, of capitalism and communism, is such that they have, both extremes, political manifestations in terms of political systems. Capitalism has democracy, and communism, socialism.

However there are definite psychological problems in the peoples who are extremists which give rise to the extremism and terrorism

of the political form. In capitalism it is thought to be arrogance and in communism, authoritarianism; however these are simply the political manifestations and their characteristics. So it is democracy which is characterised by arrogance and socialism by authoritarianism.

Capitalism-communism does, Islamically work by the operation of extremist thinking, such as the ideology of ignorance (jahilliya), however, this can be broken down into the psychopathology or sociopathology of the terrorism.

Capitalism arises, given my knowledge of economics, due to a preponderance of wealth and it's waste, inactivity and obsolescence. Capitalism will then be defined as lazy money making, it's sin and sickness is that the capitalist is lazy, apathetic. Their disease is apathy or indifference.

Communism leads to the government having ultimate say, even in cultural matters, so communists are inherently authoritarian. Capitalism is cowardice, and communism is totalitarianism too. But really communism is miserliness. Stinginess on the part of the common people.

Russians are misers because their folk aren't bothered to live only to be made to live by the government, americans are cowards because they never have the guts to rule, only to kill.

Both are historically connected to national socialism (Nazism) and national facism (Facism). People incorrectly think these are manifestation of nationalist tendancies when there is no extremism involved in nationalism. These are indeed due to the extremism of Christianity. This can be proved; Catholics create facism and protestants create Nazis, both terrorist forms.

4. Pakistan economy

Post-mercantilism, post-angloamericanism, lunni Pakistan

Freedom is freedom from foreign governments. Government exists to enhance trade and love, this is the definition of what is post-

mercantilism, the post mercantile state has no slave system. We take no prisoners.

The evil of mercantilism is it's protectionism in trade (restrictions). If trade exists to acquire goods, each and every mercantile government will therefore eventually expand in war. Trade, however, is a means to the good, not a good end in itself.

Wealth is a means to an end not an end, even if it means making ends meet only. Trade exists not to acquire goods but to be good. A mercantile government would war to expand, a neo-mercantile government wouldn't, it simply would not. In other words, the old way, of world war (Armageddon) had to war to expand, a new way would not have to and will simply not.

It is not terror which is killing americans and british, it is Chinese economic superiority, and Indian economic superiority will kill more! Pakistan will make lunni Pakistan of Angloa-americanism (The daughters of the land of the pure in pashto).

Today, the people of uk and usa believe trinity (like trinitarianism or monism or dualism or something), tomorrow they will discard this polytheism, and it's underlying materialism and dualism and through monism, refind monotheism.

Capitalism will create democracy; democracy, socialism, and socialism will create communism; and so the systems will evolve. The polytheistic orthodoxy and western barbarism are both the economic extremes of capitalism-communism, without a historical latin influence, which is now in the favour of Islam, it's centre will not hold and Angloamericanism will yield to Pakistani management model. A Muslim Britain, and a potentially Muslim America will be perceived as lunni Pakistan, daughters of Pakistan. The black and minority ethnicities will soon become the Pakistani and religious majority over white British or White American.

If political economy means the study of the effect of economic reality on the law, then Pakistani economics will transform every land of plenty to a notion of piety and make the Pakistan economy

a reality. The new science of Pakistan economy will make every European economy bow before us!

As anti-capitalists, anti-establishmentarianists and as Pakistanis, we admit to witnessing the splitting of East Pakistan and West Pakistan, as well as the West India trading company and the East India trading company. Now, through the science of Pakistan economics, Europe bows to us Asians. By 2050, there will not be a single EU country the size of the Pakistan economy.

Only in Pakistan and China, GDP per capita is both at average levels and in harmony with population size and the size of the economy, of use to us, as it provides an economising figure or equation, a balancing point of comparison with GDP per capita over the gross figure; or of personal wealth from national wealth, compared to personal wealth as national wealth.

It shows nothing other than the index of comparison of how big an economy is and how successful it is. Asian or equitous are larger so far better in the GDP per capita over the gross figure, whereas Western economies are deemed “richer” and far better on per capita GDP per capita.

It would be better for these economies however to do better at both ratios. Because a large economy doing well enjoins economies of scale and scope, whereas an average economy doing slightly better may suffer diminishing returns.

Perhaps the UN and the IMF, and other world institutions should stand up and take note that the western economy is no good over time, nor any good for the whole of our species. Indeed they are aggressive, miserly, cowardly and iniquitous. Perhaps it is best to say they are backwards and small-minded with little to offer. By contrast, former 2nd or 3rd world economies are growing faster and faster not backward and suffering from recession or depression, peaceable- not wilfully fighting others, generous based on love and compassion, and courageous, with a greater sense of governance of the people.

5- International economics

Tahreek e Pakistan

Through tahreek e Pakistan, the Pakistan movement, the creation of Pakistan, tameere Pakistan (and thereby India) and the fruition of global “Posteuropean” economic leadership by Pakistan, the romantic dream of takmeele Pakistan already exist. It is a theory of the conquest of the west, Britain and all superpowers in particular that is of economic origin and will eventually effect the economic world order.

This is the first time, Pakistanis have created Pak –nativism in the UK and demanded all that houses of worship be respected for their Muslim nature, indigeniety and nativity. Today it is noted the London eye has 32 chambers, one for each London borough.

However London boroughs are already of a Muslim majority (citing Tower Hamlets as the first to fall) and will only continue to become so (Redbridge, Waltham Forest and Newham) quickly once we realise we are a practical majority here in London. Relative as opposed to absolute being the nearer majority.

Statehood

Given, we are barely given columns for Muslim English newspapers (instead of that because we are more Muslim than Christian, Christians assume the role of occupier); only some Muslim channels are allowed, a Christian news bias remains. Given Islamic parties are few and far between, not fighting Christian parties democratically; given Christian power and only potentially Muslim rule. Indeed given English is promoted even internationally, whereas Urdu is the national language in Pakistan; Arabic is latinised instead of English being arabised; we need to bear in mind that should khilafat in the form of dar al Islam not come here, and hakoomat, government, sultanat or dawlah doesn't succeed, we will nevertheless be a type of relative majority.

2040 nation

The green light of 2040 must be given to all political constituencies in uk and usa! We must go green! If we, as Pakistanis, a mega-

army are to make something of usa, it must be that we give America a friendly face, a Pakistan- friendly face, and not be simply it's ally. Economically, in peace (PIC) theory, economic justice runs backwards to both normal concepts of "progress" and of course to the Divine will at present. First China, then India are predicted to be the world economic leaders of the near future.

2060 nation/ Muslim UK

If anything untoward were to happen to ourselves as Muslim, who live in Uk, we would have the right to report it to the authorities, who have the duty to put it proper. If, for example, our house was broken into, or a trespasser came in, as homemakers we would be able to go to the police or call the police and inform them of what happened. If the very same authorities who are there to enforce the law do not feel that they owe us this duty of protection, they will instead exploit thir position of power (that we have placed in them) and abuse the power that they have been granted and the threat will not be dealt with.

This is the state of the government of the lands of Uk and Usa for many years now due to the lengthy belligerencies in other countries resulting from an aggressive foreign policy. Indeed the authorities themselves become belligerent against the people, our people, and ultimately the abuses of state power become so much that they parallel the crimes against humanity the British and American armies commit abroad. The police, the health service, the security services and secret services as well as the army, air-force and navy become perpetrators of aggressive belligerency. Add to this the secret societies working against common people and you have a recipe for disaster, all due to the failings of the people to understand the process of rights and duties.

The aggressive belligerency of Uk and Usa marks it's wars abroad, however given their stasi-states inflict the same cruelty and injustice in the lands in which they live, the word to be used for the tyranny and oppression they commit abroad would too be "holocaust".

In other words, given there is no Biblical land the present occupiers or occupying peoples of Uk and Usa haven't occupied, instead of fixating on the fact that they are themselves aggressive, arrogant or belligerent, we should say that they represent a holocaust, a war or a form of terror, in the same Muslim lands whether they be Iraq, Syria or Afghanistan, or Uk and Usa.

The only real question here is how long can this go on for? It is not a matter of asking do we, as Muslims have the will to stand up to them, we clearly do, it is just a matter of when?

When do we see the belligerency against our people stopping? The answer is when the root cause is addressed and the root of the problem is tackled or solved. At the heart of the matter is the fact that Christianity is in practise, a very racist religion; it is also in theory, on paper, a very racist religion, which favours Israel and Israelis over others. To get to the heart of the problem we must try to stop people from being christianist and allow ourselves to revert to a natural religion, Islam.

One looks at the effort of Muslims in Uk to allow Islam to dominate other faiths, and it is possible to understand why we look at the scholars of our faith to exert their authority in jurisprudence to resolve the issue. However they will tell us that legal systems should change when there is an Islamic majority, when Muslims are over 50% of the people.

As students of religion, religious jurisprudence and religious law, this is fine, but it is also possible for us to bypass religious legal systems to see that as students of society, social theory and social science, it is the relative majority which is of some significance for us too. When there are more Muslims than non-Muslims can tell us we have a right to implement Shareeah; when there are more Muslims than, or example Christians if they are the second biggest grouping, should tell us we have a duty to implement Shareeah.

2080 nation/ Muslim USA

The Uk as we know and love is set to become a Muslim majority country by 2040, if not dar al Islam, absolute Muslim majority or

Muslim absolute majority. What we predict to occur in the next census after the one coming census, is that Muslims will be the greatest grouping over all others. The duty will be on us to affirm that we are the natural religion and we should not only become the national religion but should spread to the Usa too.

It is predicted in 2060 or 2061 for the Muslim absolute majority to begin to take hold, so the nation state of Uk is called 2060 nation. In Usa it is predicted to be 2080, so it is called the 2080 nation, these being the years when it is dar al Islam and there are predicted to be more Muslims than there are people of other faiths and so on (ie who are not of a Muslim faith).

Bypassing military failures of the west, the present of Britain is tied inextricably with four dominant sociological failures, four dominant failings whereby the British as white Christians have failed themselves and will continue to do so:

1. To maintain courtship patterns exclusively with the opposite sex
2. To have only generative sex (ie sexual intercourse using the generative organs only)
3. To get married to do this
4. To remain in marriage and not divorce
5. To have children within the confines of marriage

Given the loss of Britain to Islam due to these factors it can be said God Almighty has not willed for these to be a reality for Christians but has made them a reality for Islam and Muslims.

2040 is the year we predict America to have more Muslims praying to Allah Subhanahu wa ta Ala than Christians (excluding catholics) praying to their God. This is like today in Britain where it can be said that more people attend mosques than attend the church of England.

Whereas America is synonymous with American (Armageddon) war and atomic war (on which it has the monopoly), Pakistan as a replacement atomic power or super power brings Pak power. It's piece of the pie is growing daily, and just as mentioned in the

introduction, if North Korea means the bomb on America, the great satan, Pakistan is the bomb on Israel, the little satan, potentially the destruction of Judeo-Christianity.

With the wars of America, world wars 1 and 2 are cosmological wars, the global war of terror is a geographical war, nuclear war is a universal war. All of these show America is the monopoly warmonger. Indeed at every level; political, economic and social; military-combat, proxy and attrition.

What is peculiar to America at the time dimension, permanent and perpetual must be understood. These time dimensions are vital to our understanding the human race. To this end we must stand up as historians and we must confess that never has history testified to murder on such a large scale.

6- The future land of Islam

The UK Loop- an economic argument for Islam in the UK

The real reason behind the ascendancy of Muslims and Islam in the UK over Christian legacy population is not jihad, that is clear. It is my contention that it is not, dawah, immigration nor reproduction. If any of the conventional factors are to be considered it is atheism which is the most similar reason to why more people today prefer to pray to Allah and to attend Mosques than to follow the old Judeo-Christian past.

Atheism is a reaction, to religious rise of Islam, that is fairly clear. Censuses before the Asian invasion or specifically the integration of our people into the west, ie this century, show not only gains by Muslim populations but megalosses for Christian populous to atheism.

It is the belief which is prevalent in people that western manners are correct in assuming their superiority that is causing the takeover of Islam over the old Christian religion. Because they think and they have the audacity to teach, that western methods and science is superior to all other forms, they are materialists. So from racism comes materialism.

However, given they have never been superior, historically, for thirty to forty years now the Chinese economy is doing better than America or European countries and leading international economics; they have secretly been feeling insecure and this is causing them to disbelieve themselves in capitalism, Christianity's greatest economic system.

The Loop- why Islam is rising?

The UK

- 1 Reproduction of Muslims
- 2 Non-reproduction of Christians
- 3 Immigration from Muslim countries
- 4 Dawah and proselytization
- 5 Rise of reactionary atheism
- 6 Jihad
- 7 The Pool of Muslim population

In the table I introduce into the loop, the concept of the pool, whereby the religion taught by Prophet Muhammad (SWS) to destroy and replace Judeo- christianity, like repentance destroys sin, Al Islaam will gather in number.

Putting figures on the loop

UK	Individual contribution of each factor in millions per year	Individual contribution of each factor in millions over next 50 years
Reproduction of Muslims	1 extra million Muslims are born every year, approximately	50 million
Non-reproduction of Christians	Christians are in decline	No percept of Christianity
Immigration	1 lakh	5 million
Dawah and proselytization	Approximately 5 thousand p/a	1/4 million
Rise of reactionary atheism	Over 10 million this century	Upto all of them (37 million)
Jihad	Thousands	A fraction of a million
The Pool of Muslim population (or Total)	5 million	$5 \times 7 = 35$ million

Diagram 16: If all 7 factors are at 5 million, on average over 50 years (which is half a million per year), UK Christianity will be wiped out.

UK	Individual contribution of each factor in millions per decade	Coming census which will predictively yield a Muslim relative majority based on the factor alone
Reproduction of Muslims	10 extra million Muslims are born every decade, approximately	2050
Non-reproduction of Christians	Christians are in decline	Non-applicable
Immigration	1	2050
Dawah and proselytization	Approximately 50 thousand	5700
Rise of reactionary atheism	Over 10 million	2040
Jihad	Thousands	3200
The Pool of Muslim population (or Total)	5 million	$5 \times 7 = 35$ million

Diagram 17: The estimated year each individual factor would contribute to Islamic ascension.

Statehood, war and politics

The definition of a state is that there is a certain group of people or a class of people, who have political power and control over the resources and the people and the boundaries, within a specific geographical area.

The definition of war is that people will kill another people given that they are outside of a certain geographical area. International war therefore is something which can be said to be specific to “global war” or “world war”

The great calamities of mankind are, interestingly, all caused by Angloamerican oppression, and if not, the oppression of Christianity, and they all bear the hallmark of famine:

1. The red indian holocaust (in America), the African holocaust (ie slavery)
2. “The holocaust”
3. “World” wars
4. Russian, Chinese and Indian revolutionary famines

The state, therefore is seen as the object of peace, Islamically, as, the article of peace. It's existence precludes from it's existence, the existence of war. Whomsoever America has warred with becomes a hero, as opposed to the enemy. Whichever Muslim country that America hasn't transgressed and warred against becomes the enemy.

War is terror but terror is not war

The fight against capitalist USA, is peculiar to Muslims as we so often speak of the enemy of humans spirituality to be materialism, and capitalism is an obvious form of materialism. Nevertheless, much as though the defeat of American materialism at the hands of Communist China, which is now a greater sized economy as per GDP (PPP) than America has ever been, attests to the practice of an economic system, such as dialectical materialism or scientific socialism, it is the military misadventure which seems to have greater relevance as to why America is a failed state.

Capitalism-communism is corrupt, and it is the system which is corrupt and pure extremism. However after America and Russia, and India and China, there are only North Korea and Pakistan which have mega-armies.

Given all enter into trade with good intentions except Americans, and love and trade are the health of the state, although not for Americans, American purpose is relegated to war, "War is the health of the United States" being no exaggeration, and Pakistan is no exception to the rule of trade and common love, surely USA must think of trying to fight Pakistan, through proxy or whichever way it can.

Otherwise, given war is the disease of the civilisation, Pakistan, India, China, Indonesia and other countries will not be able to stop US war of terror from failing. Indeed the rest of the world will begin to ask, which other wars, declared or otherwise, have been lost by USA, WW1, WW2, now WW3?

War, or state terror, however we define it, is worse and bears heavier as a burden on social conscience than terror for the simple reason that war is worse than terror. Look at Pakistan and you can see that fact very clearly. As a nation, terrorist attacks are a worry and a threat for the timebeing. Nevertheless, war and state terror, be it internally or externally caused, is and will for the foreseeable future remain, an unconscionable mitigation of our souls' conscience and our nations' (including our neighbours) territorial dignity and integrity.

War is often worse than terror, simply because war is huge-scale terror, whereas terror concerns the loss of life, war is the loss of a country's sovereignty.

What a black majority ethical Britain has to offer the "white-man" Just as the definition of the "state" is any governing group or class of people which has and exercises sufficient political power and control over the people at large to tell them what to do within a specific geographical area, the definition of "war" is any fight which is outside the bounds of a country and causes casualties in a large scale, in a separate geographical area: another country.

Statehood, therefore is a peaceable concept, by definition as an international idea. A mixed economy precludes from it's existence, the existence of evils. There is no thought of murder and rape here. All famines are, interestingly, caused by angloamericanism, by

	Famine	Military war	Materially-caused or caused by failure of capital
Chinese revolution	Crores		Yes
Russian revolution	Crores		Yes
Indian occupation	Crores		Yes
Slavery	Crores		Yes
Usurping of Native America	Crores		Yes
World wars	Crores		Yes
GWOT		Crores	No

Figure 18 - Tens of millions lives lost for no reason

Christian oppression, especially the global war, also a megawar, because it is, and only it is, direct and indirect military war. International war is therefore specific to global war, which is caused by Christian countries.

If history says holocaust was the hallmark of world war, I refute this, it was famine. Anyway holocaust was by Germans, on Germans. There was no Israel and no Israelis. Ukraine had megafamine afflicted on it, as did India, here Russia was an aggressor as was Britain.

Politics is the work by a certain group of people that effects change on the social structure of themselves and other groups of people. If we in Britain have a problem with Islamic state coming here, it is a problem with the Muslim world.

Why? Did dinosaurs?

Why? Do Nazarenes ie the original Christians, the Apostles (of Jesus)?

Why? Do any non-human primates?

Pre-history, religion and the animal kingdom, and their relation to humanity as we know it today, is tied to Islam and the lands of Islam. Dinosaurs, we are told come from the warmer climes of the world, the now MUSLIM world; the apostles of Prophets, the Prophets themselves lived in the Middle East, largely seen as the MUSLIM world; and indeed non-human primates all only really live in the warm climates of Middle East, Africa and Asia, the now MUSLIM world.

If we are to have a problem racially, why not with Europeans, instigators of slavery and colonialism, when we hear them say, “it’s not what this country has to offer you, but you can offer your country”, a voice in our head is legitimate when it says “it’s not what white-man has to offer the Angelic creed, it’s what the devil has to offer the white-man”.

Non-reproduction of Christians

8 out of 10 people prefer it

While around 11% of the present population of the world has been murdered by the US and the former USSR ((8 x 100m)/ 7 billion), people happily, in the UK are, unwittingly to the media, 4 out of 10 prayers in places of worship; serving Allah Subhanahu wa ta Ala. 1.3m Muslims /3.3m (1.3 Muslims +1m Catholics + 0.8 Anglicans +0.2m other)=0.4

Who would believe it, 4 out of 10 Britons pray to God in din-e-haq, the real religion of monotheism, Britain's future religion and reality in terms of popular religion and commoner faith.

Islam is Britain's future religion, why? It is already the real, true and most practised, more than Protestantism or Catholicism on their own. It is no doubt, the subtle faith, the faith of Allah's beautiful Names and us that take them prayerfully.

It is not the practice of these Islands to be Christian or hypocrite, like the political, economic and social façade that is the corrupt USA.

Eight out of ten worshippers in British places of worship are either Christian or Muslim. By Allah, I tell you in truth, a day is coming, 8 out of 10 will be Muslim (or 7 out of 10). We are already a commoner faith, with more adherents on a daily and weekly basis, purely in faith (as per census) no, but through action (as per attendees).

Immigration from Muslim countries

The fact is, and is increasingly so as time goes by, that in peacetime in UK or USA it is easy to say Islam is not an extremist religion, given in UK just as many people attend mosque on a Friday as do church on Sundays.

Personally, I think most capitalists, not necessarily US citizens but US loyal people, and communists are extremists. Indeed I could happily quote Jesus as explicating, "You cannot serve two masters". Too, I see the mark of Cain in the Christian, Capitalism-communism, and like many Muslims and non-Muslims, in Jews too.

Dawah and proselytization

Today, Islam is a mega army in Britain in terms of attendees of places of worship, and no other faith is. This is known by calculating weekly congregants in Britain's places of worship. If we look at the daily practice we see that as Islam ordains five daily ritual prayers, that a similar number of Muslims observe daily prayer. Other faiths, such as Christianity will only attend their churches though under one percent of times in Britain. As much as our enemies wish to separate Islam from ruling government, we desire a caliphate, and that is the uniting of Islam and our concept and practise of statehood and government.

Rise of reactionary atheism

If Christians say that they have brought this gnosis, then I am saying they are inferior in Britain. Because they have friendship with Jews, they say they killed "God" and now are themselves atheist but insist on ruling a Muslim land potentially, in actuality, a land where just as many people pray to Allah (4 out of 10 weekly worshippers) as to the Judeo-Christian deities (5 out of 10 weekly worshippers) and more on a daily basis in the places of worship. Allah ta Ala says this in The Holy Quran that they boast this and that it is an untruth that they utter. So what if they become disbelievers first and foremost in Allah ta ala and His Messenger (S) then in Jesus (P) and now in Christianity and the Holy spirit itself? Well, of course we have to rule over them.

Jihad

"There are clear rules of engagement in Islam relating to warfare, which were laid down by Prophet Muhammad—peace be upon him—and Caliph Abu Bakr.

Those rules include the following:

- give diplomacy a chance before battle starts; respect treaties;

- do not harm women, children, the elderly and religious persons;
- do not destroy crops and trees;
- protect all places of worship; treat well all prisoners of war;
- allow the bodies of soldiers slain in battle to be buried in dignity.

These rules of engagement were laid down well before the Geneva conventions. The acts of the so-called jihadists are totally un-Islamic and we utterly condemn what they have done and are doing.

In the 7th century when Muslims conquered Jerusalem, Caliph Omar signed the first Jerusalem declaration, which preserved the rights of existence and ensured the well-being of everyone in Jerusalem.”

- Lord Sheikh, speech to the house of lords

The Muslim population

Is Islamic conquest, a structural functional theory?

Sociological? Yes! Statistical? Yes! Structural? Yes! Funtional? Yes! Structural functional? No! It is a theory of Islamic sociological account and so is tableegh or dawah. I believe in primary sociology, as an Islamic pragmatist, I believe in a primary social religion, a return to praxis ie. Faith through to action. I believe in a symbiotic society.

I disagree that Yugoslavia, where Muslim homes were destroyed because they never merged their families with Christians, was symbiosis. In Bosnia, in Srebenica and Sarajevo, there was war, in

Serbia and Croatia too. Indeed genocide etc. because Muslims and Christians as societies only lived together.

Islam

Prophet Jesus (P) was made by his Maker, Allah Bari ta Ala. Jesus does not relate to the creation in any specific way except as per his own existence. He was made by the word, at the word. As Muslims we say he is not the word, in the sense that his creation is part and parcel of God's creation not above it in a way such as it would be "uncreated", not even spiritually speaking:

"He said, "I am only the messenger of your Lord to give you [news of] a pure boy.""

Verse 19 Surah Maryam, The Holy Quran

"It is not [befitting] for Allah to take a son; exalted is He! When He decrees an affair, He only says to it, "Be," and it is."

Verse 35 Surah Maryam, The Holy Quran

The "Christian" godhead of today is a death-threat to everyone. The common faith in UK is now Islam, the social religion is clearly Islam. The primary social reason people attend places of worship in the UK is to worship Allah ta Ala. Islam is the primary daily religion in the States too. Christianity is a legacy in places of worship, a computer hardware that doesn't work and is now redundant. Islam is our new religion, Christianity, the old religion. Indeed Christianity is associated with those in the census who say they have "no religion". Why doesn't the government just come out and ask people if they are religious, believers of Muslim faith, to tick Islam as their religion, and if they're Christian or atheist to tick "no religion"? Christianity and the Church are the secondary daily religion, an uncommon faith, an uncommon praxis in UK as well as USA, associated with atheists and people of "no religion".

Chapter 4- Independence theory

The creation of independence theory in the west

When we look at the fashioning of our society as one which is throughout the world, not just in Iraq, Syria, Afghanistan; but in Pakistan, Somalia, Saudi Arabia, is one of divide and rule as a very polite term that Indians would use. We should be harsher in our critique of people and in our lexicon. It is divisive to pit religions against one another and is something we should learn as the word of the occupier (an insurgency instigating in foreign lands) that wars here.

It is very easy to forget, given how forgiving we are here; the land of Abraham's birthplace, the land of Jesus, the land of our neighbours; and our land, Pakistan, created 70 years ago by Muhammad Ali Jinnah.

Indeed, we as Muslims win the war of terror by taking the word "occupier" and applying it to the white man here in the west. But truly megamurder (ie undeclared military assault on our peoples) and gigamurder (historical wars in total) can only be cured by fighting steel with steel, it takes steel to cut steel.

By the instigation of giga-economics, gigaforces and gigapowers (or economies) can be brought about a sense of reliance on our Holy Book, The Qu'ran Sharif as our source of guidance for both economic and political life and such things, instead of, for example, dependency theory which falsely teaches subservience to other things.

A majority black and ethnic minorities' London means ethnic minority status for whites is practical and pragmatic. Marxism, like capitalism is inherently racist and evil. Is it not socially pragmatic to forget, indeed to forgive and forget the so-called "transformative"

replacement theology or liberation theology of the white christian pedagogy and hegemony?

Surely their genocide is too political, here transferring what are possible and practical from the occupying hands to a new demography is preferable thus rendering the world and the richer parts of it with a new Islamic sociology. This is the defeat of racism and evolutionism; America is a daily praxis in deen-e-Islam, a good example of how it wants Islam in the future. Weekly worship in the Divine code of Shariah is there for all to gain.

1.The irony of capital

Against traditional economics

Unlike the Nazi or Zionist agendas of those who have implemented the “powers-that-be” mentality in the world, with nationalism’s every evil let loose upon humanity, the Muslim peoples, Muslim culture, properly termed Islamic culture is here to liberate and emancipate the so-called advanced economies. They believe in the so-called moral superiority complex of their peoples, and in the Vedas and their books, but we believe in God, we believe in our Holy book, we believe in Allah’s last Messenger, Muhammad (sall Allahu alaihi wa salam).

And we believe that we can advent the replacement of the theology behind this evil, albeit as only a future, near majority, we can be finally even here in the so-called “rich” countries, near to Allah, and God is always near the struggle.

In E7 economies, the global depression has led to the land being purged and money created for capital and labour. This will mean investment in social capital etc. In G7 economies the deficit money basically, comes out from cash so they will contract, in terms of cash, size and even religious change will take place, in my opinion.

E7	\$B		G7	\$B
China	10,380		US	17,768
Brazil	2,353		Japan	4,616
India	2,050		Germany	3,860
Russia	1,857		France	2,847
Mexico	1,283		UK	2,945
Indonesia	889		Italy	2,148
Turkey	806		Canada	1,789

Figure 19 - 2014 nominal GDP per country, E7 VS G7. IMF

Halfway house to dar al Islam.

The forfeiting of religious knowledge, wisdom and understanding, by the people of this country, Britain, has caused an imperceptible chasm between the fact of Islamic ascendancy and the phantasm of christianism in legislature. Due to the rise and fall of economic models of knowing cultures and civilisations, so for example that Jews are arrogant towards God, capitalists are cowardly and communists are lazy; a new conceptualisation of Allah's religion, deen e Islam, has emerged in Britain in the world.

Instead of growing on the capital cities and penetrating the capital cities of British home countries, Islam is now rising in the realm of industrialised cities first, and quickly replacing the christian urbanisation. Instead of Islam becoming more popular in London, Cardiff, Edinburgh, Belfast and Dublin; it is instead rising due to the replacement of the myth of anglo-americanism with peaceable economic models, in London, Birmingham, Leeds, Manchester, Sheffield, and from there on in to the capital cities of the home countries in UK.

An industrialisation-minded Islam with a fresh economic vision, with its own macroeconomic model, is now heralding an industrial Islam in the world. Cities like Bradford, where nearly half the people are Muslim, speak of the game of cat and mouse between Islam, the truth and the money-minded who have disowned every civil virtue and polity.

Channel 4's own survey there reveals the half-way house to dar al Islam has already been reached both in people's minds (60% acknowledge Muslims to be over 25% of the total population), and in the census data as 25% of the population is alhumdulillah, Muslim (2011 Census).

20,40 is a theory of Islamic ascendancy which shows through sociological and statistical fact that mathematically an Islamic "dar al Islam" is coming our way once Muslims are in the 20 to 40% population bracket. Because if 40% are Muslim, 40 Christian and 20 other faiths, Islam can still be termed the religious majority and so should effect legislature. By this I mean the calendar, the royalty and the official language and religion should all be changed. Indeed in 2011, Bradford had 25% Muslim population, given the birth rate ascendancy of Islam and the Muslim way of life, biologically, the same industrial cities of the past, Sheffield, Birmingham, Leeds, Manchester and Liverpool will inshallah too become, half way house to dar al Islam, perhaps in the next census after next years one.

London, too will be having more Muslims than any other faith group by then. 2031. By 2032 the analysis of the census may well be released and will reveal a relative majority of Muslims over Christians. This will mean a replacement of theology and legislature as well as, inshallah, governance and religion in official terms. The future for Britain and it's dominion, with the capital city and seat of government being London is written in to Islam. The government here are no more than occupiers. The minute we assume as Muslims this to be the case we as a nation will recognise it. They are nothing more than mere urban planners without foresight of any real kind. The so-called British government are indeed including the royalty, as a sort of self-created evil who bear little relevance to the people who are now growing in knowledge and wise to the fact of Islam conquering the rest of the world in the sense of non-dar al Islam countries or economies of the world.

In truth the Britain in which we live, the Muslim Britain is a 2040 nation. One which will by then yield to the Muslim majority as per the scholarly definition of a relative Muslim majority. In truth this

has come not as a military conquest or through dawah but through economic empowerment and ascendancy. The importance of all this taking place in the Asian century (the 21st Century) as opposed to the American century (the last century) shouldn't be ignored.

However, industrial-scale Islam in the west alone is not the answer. If it is to come about it will only do so through billions of new human beings being born over the space of a few years at a time, to immigrate or to fight and compete at least with the white man, who through Slavery, Red Indian holocaust, Russian revolution, Chinese (cultural) revolution and the occupation of India has killed hundreds of millions of people at a time. Pakistan, India and China may be gigaforges in their own right, true, and other countries, such as superpowers are not; but it is the fact that over the next 30 years a billion children will be born in these countries (in Pakistan, in India and in China) that leads to us to take Islam and the notion of the peaceable rise seriously. Indeed to take India seriously as the gigapower of the future.

We are to make a change in Europe by effecting a new religion en masse for the European peoples, as we know them, and we can only do this if we retain a pure and pristine Islam, taught by Prophet Muhammad (SWS), the Prophet of Allah (SWS). Kowtowing to a relative majority or an absolute majority is not going to be the answer or the solution to the problems. We are here to change Christianity into Islam and to do this we must begin to look at Islamic nations and ask why are they successful? Why are they the European countries' model? What can we learn from Islamic countries? Why are all the holy lands of earth in the hands of Islam?

Because, as we are learning this lesson in European Islam; firstly, Islam is for all the people and secondly, Islam is a complete way of life. This is why, even in Palestine, over 50% of people are Muslim, no more due to Zionist entity's occupation. In the rest of the Islamic countries, ninety-something percent both practice Islam as a religion and are faithful to their spouses and have children only within the confines of marriage.

We should not try to dilute this by aiming for a society where we keel to Islam. If we accept that half a society should be Muslim and call this dar al Islam, our coming generation at least our potential generation will not be nursed nor will our interests be protected. To bring a theory of economic and religious ascendancy is dangerous because not millions but billions of martyrs are lost to the perpetrators and instigators against our people. Whereas they want to kill a billion people, the peaceable replacement to anglo-american management, macro economically is the supergroup. The supergroup can in the blink of an eye, literally the waiving of a single census or decade, give birth to a billion children.

Every two or three decades' census will show, Pakistan, India and China giving birth to around a billion people and more nationals in the near future. What will happen is these economies will both grow and will eat up eurowarmongering economies stagnant in war as they are.

Deen (Knowing God)

We, as Muslims are here to change Europe, whose chief export of late is the J-bomb, which it packaged to create america, the great satan and more recently Israel, the little satan; however we will install a middle class in the rest of the world that will change the idea that revenge should be taken for the murder of Jesus and that this should be the founding precipice for economic endeavour. Clearly, industrial Islam is the answer, an industrialised Islamic world will transform the whole world into one great big dar al Islam in this century where nearly the majority (the majority according to 20,40) will practice Islam towards the end of this century, as close to 40% of the world's population become Muslim. Around the same time, the end of this century, Islam is scheduled to become the greatest religion on earth.

Raw materials

"Muslims have common share in three things: grass (pasture), water and fire (fuel)."

Prophetic hadith

Reparations

The current so-called superpower, America, a superpower which prides itself on the superego or the occasion of reception of the holy or the spirit as opposed to the intellectual tradition of religion, which is in fact an arrogant power, because of its theft of (resources such as) land, labour and even its language is a theft really.

We say as social beings that a friend of a friend is a friend but we find in fact, that we don't converse well with disbelievers in Allah ta Ala and His religion of Islam, or non-Muslims. So it seems that a friend of our friend is an enemy for America and its religious way, including its intellectual and spiritual traditions and it is a vast tradition that we have undertaken.

Given that all of the Holy or Middle Eastern traditions or the Holy traditional people are under Dar al Islam. One would say under khilafat and we too are eventually under kamiliyat ijtimaiyyah and the concept that we have of Dar al Islam because of the Holy lands winning in these wars of terror being inflicted by whoever has inflicted them; these afflictions have caused the expulsion of these countries and before we note the expulsion of the military communities from the Holy lands we note the ascendancy of Dar al Islam in the occupied lands.

As philosophers, psychologists or sociologists we note that Dar al Islam is coming soon in these lands which are presently occupied and the theory of governance of the same lands is absent here given that we are witness to the expulsion of their armies but before that we are witness to our mega armies in these occupied lands.

And we are not afraid of pogroms and holocausts of the past. Some say these countries have nurtured nothing but fascism, nazism and communism, i.e. they have a racist totalitarian social system in the past. Assuming no more pogroms and holocausts in the future, (*ceteris paribus*) a fact that is down to the occupation of lands but given that they have no power over places of worship

rather they claim power over places of education; it has become possible to say that in the future we will find Dar al Islam here.

Given that they denied, inter alia, Dar al Islam, a government in Islam, they will look to the future and not find a government. Because a friend of their friend is not a friend but an enemy. We can assume that ergo there is no government here other than the one that is in Islam, heading towards Dar al Islam.

The seeds of discontent with capitalist USA are rooted in the fact that unless profits are purified by having both a social and theological cause as well as a goal, they will remain impure and hateful, unable to serve, which is their ultimate undisclosed aim, slavery. Conquest is but one of the types of reparation: financial, dumping, freezing of assets, actions and actors, gold as a reserve currency and reversal of 1st etc world definition.

The G7 economies

Canada—Financial— — — —Native America
(Red Indian holocaust)

US— —dumping of assets— — —West Africa
(Slavery)

France— -freezing of assets— — — —world
(WW1)

Germany— -freezing of actions— — — -world
(WW2)

Italy—freezing of actor— — — — —Ethiopia
(African holocaust)

Japan— —gold as a reserve— — — — —Itself
(Atomic bombs)

UK —Reversal of 1st world— — — — —Islam
(GWOT)

Figure 20 - The above system for reparations discounts war as a possibility in the future

The G7, one by one

Canada- After all Canada is basically Native American land, even the present Canadian government admit that, given Americans as we know them, drove Red Indians out of present day America, as it were. However because of the ongoing nature of the holocaust against them it is now a race against time to compensate them financially for crimes against humanity, that are too ongoing.

US- Again, after millions of slaves were taken from present day Muslim lands, or rightly it should be said that millions of slaves were taken from Muslim lands, and millions of our people lost our lives then, either on the way to, as it were, or in USA; US assets must be dumped on other countries. This means sold at low or next to no cost to West Africans or other peoples outside of US.

France- For basically claiming the whole world is a war for themselves, France must have it's assets frozen by the rest of the world. This way Muslims could regenerate in France.

Germany- Similarly Germans shouldn't be allowed to do anything, including pay holocaust money to Britain or US.

Italy- Rome should have actors such as the papal city actors frozen and unable to inflict their continuing racist evil against people.

Japan - Asia's price for a ticket to the superpower league should be refunded, if only by using gold as a reserve currency instead of USD.

UK- The GWOT must be declared to be lost to Islam, and Muslim countries declared to be 1st or 2nd world, whilst, UK, USA and the rest of the G7, declared to be 2nd or 3rd world.

2. The irony of labour

Against socialism

The irony of socialism and ultimately the western communities' collectively Islamophobic mindset, is that it is driven by Marxism and that the main text of dissent from capitalism, which Russians and Chinese use to love to fight and hate americans, is called, "The Capital", or in German "Das Kapital".

Equally ironic is the Muslimophobe. The european who loves to hate communism or the American who fights every small socialist country in asymmetric warfare, is really priding his (and his enemies') lives on his labour or his work. Working for the man isn't everything in life, having a job and earning money aren't the only things to do in life, and neither is social philosophy of fighting others. And these things are not clever, not in the slightest. The fact remains, capitalism- communism has been expelled from the Holy lands, from the Middle East in this world, and for those who know about economics and what the word really means, will know, and understand, that that is right. The system is corrupt and works corruption.

Pakistan and the future generation – The enlightened future of an economic miracle

The Pic theory spells the rise of Pakistan as a superpower through it's goal of ascendancy and domination. Through deprivation of and not the assertion of the religion of the Muslim Pakistanis was formed the nation of Pakistan, and so Pakistan's creation till now we, as Muslim Pakistanis seek to save ourselves from deprivation and not to unnecessarily assert religious rights of self or other.

TYPES OF ECONOMIES

Types of economic systems

Nations of the Muslim Ummah- Muslim countries and Middle Eastern countries etc

Communist countries- China, Russia

Democracies- India and some African countries such as Zimbabwe and South Africa

Wealth economy- USA, UK

A difference between Islam (religious law) and convention (only natural law)

Flow of knowledge (trickle-down effect):-

As an example of the one-way flow of knowledge from Islam to Marxism, liberalism, capitalism is Pakistan. Here is a country where the founders of Buddhism, Hinduism and Sikhism and some very important leaders of the Islaamic faith were born. So these descendents, if you like gave birth to democracy and capitalism. There is logically a flow of information here, a flow of knowledge and indeed a trickle-down of economic power.

Dukaandaari:-

We go to a shop or a market, Marxism tells us quite incorrectly, the major difference between us and him, buyer and seller is one of ownership, similar to the kapitalismus. Islaam says no. There is ibadaat in a shopkeeper, bookkeeper etc, even there is jihad.

Shopkeeper: Stock and Customer

Customer: Goods and money

Zakhaair (Stocks/shares/commodities/bonds/gilts)

Examples of zakheera and by extension of any slag thereof, imply this sort of qualititative idea of use as opposed to the exchange value:

“The wealth of those societies in which the capitalist mode of production prevails, presents itself as “an immense accumulation of commodities,” its unit being a single commodity. Our investigation must therefore begin with the analysis of a commodity.

A commodity is, in the first place, an object outside us, a thing that by its properties satisfies human wants of some sort or another.

The nature of such wants, whether, for instance, they spring from the stomach or from fancy, makes no difference. Neither are we here concerned to know how the object satisfies these wants, whether directly as means of subsistence, or indirectly as means of production.

Every useful thing, as iron, paper, etc. may be looked at from the two points of view of quality and quantity. It is an assemblage of many properties, and may therefore be of use in various ways. To discover the various uses of things is the work of history. So also is the establishment of socially-recognized standards of measure for the quantities of these useful objects. The diversity of these measures has its origin partly in the diverse nature of the objects to be measured, partly in convention.

The utility of a thing makes it a use value. But this utility is not a thing of air. Being limited by the physical properties of the commodity, it has no existence apart from that commodity. A commodity, such as iron, corn, or a diamond, is therefore, so far as it is a material thing, a use value, something useful. This property of a commodity is independent of the amount of labour required to appropriate its useful qualities. When treating of use value, we always assume to be dealing with definite quantities, such as dozens of watches, yards of linen, or tons of iron. The use values of commodities furnish the material for a special study, that of the commercial knowledge of commodities. Use values become a reality only by use or consumption: they also constitute the substance of all wealth, whatever may be the social form of that wealth. In the form of society we are about to consider, they are, in addition, the material depositories of exchange value. Exchange value, at first sight, presents itself as a quantitative relation, as the proportion in which values in use of one sort are exchanged for those of another sort, a relation constantly changing with time and place. Hence exchange value appears to be something accidental and purely relative, and consequently an intrinsic value, i.e., an exchange value that is inseparably connected with, inherent in commodities, seems a contradiction in terms.” - Beginning of “Das Kapital” by Marx

Thus use is opposed to exchange value, which is quantitative so is slag. Wealth economics are basic riba economies' way of controlling money flows. They are haraamkhorī, literally the eating of that which is forbidden.

Postmercantilism

Post-mercantilism is the economic system where within an economy, money is the only form of wealth and internationally there is no benefit to other nations of international trade.

If we bifurcate production into primary and secondary, we see a nation's secondary production concerns itself with the agreeableness of service industries and post-production. Unlike primary production which operates at the level of turning raw materials and resources into goods, post-mercantile production and secondary production turn goods into services and land and labour into services. Investment and innovation are turned towards the supply or provision of services.

To know what is post-mercantilism first we must define the economic system of mercantilism. Mercantilism is simply when money is the only form of wealth that is acceptable to a society or nation. Post-mercantilism then becomes when that nation or country sees itself as being of no benefit or use to others in international trade.

Post-mercantile economies concern themselves with secondary production because:

1. Money is a false commodity
2. The dangerous flaunting of secondary economies

Ironically, these same economies are termed 1st world whereas primary production economies are called developing world. Their terrible motive of economy, efficiency and effectiveness MUST in time be replaced by more equal, equitable and egalitarian ideas.

Some sort of theory of ontological secondment or phylogenic secondment of so-called “developed” economies would be needed for this however.

Theoretically, we could place the same first, second and third worlds on a historical timescale and relate their importance in this way. Accordingly, Pakistan and India would, for example, take preference, in terms of development etc, over, say, China or America. In the future Islamic economies will be the only “First” world and the capitalists will be relegated to the present “Second” world. The third world will be destroyed as a term and it will no longer be relevant to any countries as such.

Islam – Social and World Peace

“O mankind, fear your Lord, who created you from one soul and created from it its mate and dispersed from both of them many men and women. And fear Allah , through whom you ask one another, and the wombs. Indeed Allah is ever, over you, an Observer.”

- The Holy Quran 4:1

The 3 e’s; economy, efficiency and effectiveness should become the new 3 e’s: equality, equity and egalite. The obligation to, the fairness for and the rights of all of society, then all of the world should not be ignored.

So after the sin of Prophet Adam (A.S.) humanity was left in the world, outside of paradise, many cultures and civilisations have emerged and declined between now and then, but how did materialism come to offer post- mercantilism as a way to live? Is it not true, God made Indra civilisation and the Chinese civilisation but not our first world countries? Was that the Devil? Was it by themselves? Or was it those same Indra and Chinese and Persian Gulf region countries that made post-mercantilism? This is what we must believe. That through our understanding of materialism we have created a menace and only we know it’s cure and the solution to it’s problem.

I hinted at the American warmongery as a root of this problem of the biological denigration and subversion of the reproductive and replacement system. Further to this it concerns not only the actual population outside of America but that the means by which the American federal government has biologically annihilated our humanity and specifically the African humanity actually operates here in the UK too.

Extended families as a proof from the children of Adam (AS)
The extended family is the exclusive mode of family life in Pakistan and the sub-continent for the simple fact that family life is deemed to be connected to and to arise for the purpose of closeness and connection to Allah ta Ala (God Almighty).

The khandani ahliat (joint or combined family system) is so intrinsically interwoven into perfection, of socio-economic relevance in the Pakistani sub-continent as in no other place in human civilisations and cultures. So, what is the khandani ahliat? What does joint or combined family system mean?

Literally, being family-minded or having the mind of a family being. Indeed in any family studies, all relationships must be returned to Allah ta Ala (God Almighty) since they are part and parcel, being of the system of creation and creatures, of the system of worship, the system of Allah ta ala, The Creator of mankind.

“Save yourselves and your family from a fire whose fuel is men and stones.”

Holy Quran 66:6

(Apne aap ko aur apne ahl o ayal ko jahanum se bachana)

Mushtarqa ahl o ayal

Combining in one's personal life, one's social, economic and political ties into a way of expressing elements of inner faith and worship is the meaning of, accompanied by certain rites and rituals, life and being a good human being, indeed of being a Muslim and a good Muslim at that.

Being in the company of a person of a combined family system is different indeed, it is a more pleasant experience than being in the company of someone who is not, this is true whether they are themselves accompanied by someone of their own family especially, and also true, if not.

Similarly, everyone has a family; their ultimate father as a species is Prophet Adam (peace be upon him), the father of humanity and the human family. This gives us from the Pakistan sub-continent a distinct psychogeography.

The bio-social family is a critique of fluid families as it has a bottom-up approach as opposed to a top-down one. Indeed if the nuclear family is a taken-for-granted instead of being a rarity, only then can a larger family pattern emerge, where many families combine into one bigger family. This being beneficial to both the biological and social structure(s). It can be for example be a means of cheaper labour.

The Oceanic Emotion

Freud, psychoanalysis and transactional analysis

In his books Dr Sigmund Freud says religion is an illusion, pointing to the sin and sickness of Jews and Christians in Europe, largely. The Oceanic emotion he says is a precipitate for religion's facts over it's feelings.

Transactional analysis has shown how parent, adult and child, or PAC analysis reveals facets of the personality that were otherwise unknown.

In both cases there is a stress on either Superego or Parent to "take the bullet" or be the cause for religiousness or religiousity, but childishness and ego always gets in the way as far as the Ahl e kitab go.

3. Interdependency

Against materialism

Inspite of christian majority peoples (cultures) doing their best all the time to maximise the millions of people, innocent Muslims that they kill; us Muslims who are a minority here have (instead of demanding our rights and equality or freedom) managed to dispense a sustainable sense of justice or system of justice whereby we give zakat freely and help others liberally.

Despite the millions of Muslims girls (and Bosnian women), christians tried to give babies to (who would be christians too), Muslims have correctly attributed the phenomenon of megarape as an evil of the so-called sexual revolution.

Nonetheless there are sometimes, in the midst of christianity's history of forced conversions and ill-mannered soft war, wrongs committed which create an impetus for more severe social justice to be done to correct them.

Indeed if we are charitable we should understand why we are and how it is good if we are. It is the contention of this chapter that zakat is a just and good cause on the personal and socio-cultural level.

Savings creates inflation whereas zakat creates sufficient extra consumption to have a positive effect on national income as well. Real paradox of thrift' maxim: Saving is like zakat but it is taxed and has a negative effect on national income: Indeed thrift and scarcity economics is countered by The Holy Quran teaching that God's hand is unfettered to all and the teaching of equality of all humanity before Allah.

Giving away in an economy causes no decrease to national income and can effect consumption better than savings would, so it is a purification of wealth. It increases wealth with Allah ta Ala. The Say's law and Keynesian paradox of thrift show that supply augmentation can spur growth, investment and savings act the same time with inflation. It derives itself from the ZAKAT FUNCTION, the real paradox of thrift. People start to redistribute wealth, creating growth, investing, making jobs and costing inflation in the economy.

If, in a recession, aggregate supply falls or contracts as per supply theorists, this is better. If it goes down, there will be a quality gain. This is at the cost of economic performance, so both output levels and prices will reflect this. Indeed if supply siders deal better with inflation, Zakat economists will too. If instead of expansion of supply, it falls down, inflation is curbed AND there is economic growth. This may mean we are therefore working harder for ourselves and we drive the economy harder. Especially in recession and depression.

This anti-keynsianism or anti-deficitary economics is in line with the idea that Zakat economics like zakat itself, increases wealth and does't decrease it.

Financially risky cultures are unsatisfied with wealth and this explains why they are highly borrowing. However borrowing highly means borrowing from the poor. If in times of recession this borrowing increases as do deficits and cash, other reserves and prosperity all fall; then surely it is time for the poor to catch up. It is time for revolution; feminist, industrialist, evolutionist; all are developmental economics way forward, our way forward. If we don't lend money to the third world for free we should no longer expect them not to be richer than us, for all the riches in social and other capital we all acknowledge they do possess. In a world of haves and have-nots, we the comparatively rich will never be happier for economic superiority. For the have-nots, the needy, it is a struggle for food and starvation, a breath of fresh air to breathe.

What is happening here is that people are setting a precedent by giving to those who have gone begging as ultimately this is like lending money to someone in your family if they've left their wallet at home.

However government deficit and. corporate leverage or gearing does not fit into this category, it creates a big problem instead of offering us an example, a good example that is.

There is a theory of humanity here, in government budgetary defecitary economics and in corporate financial risk. No respect

should be given to Keynes and his ideas let alone to the zombie corporations in debt.

We need to look in life further into our own hearts to know wealth and riches, to dig deeper into our own souls and our own private and personal reality.

Here we will find the “compassionate family” or our own personal “compassionate heart”, one that gives not takes. One that, like your Prophet, the Beloved of God (PBUH) fasts whilst others eat, prays whilst they sleep, cries whilst they laugh and feeds others, prays for others, cries for others they would not do the same for him perhaps.

Happiness and prosperity is spending money for the poor, but saving for the rich; honesty, frugality and prudence are all one and the same thing, they are assumptions of mutual love and respect. They are assumptions of truth for all in a society. In the economy we see over borrowing, overtrading, over- lending and over-consuming witness a country which is victim of overdevelopment. We should be settling, repaying, paying off and being poor instead. The real paradox of thrift is giving zakat, the more we give the more our wealth is purified. It is not just as simple as the more we save, national income rises; it is also true that if we give to others it is good.

The consumption function assumes higher income bracketed are doing better, so can the rest with lower taxes, but a zakat function says all income groups should serve poorer people and this is good.

Borrowing, debt, lending and money itself are all a corruption, economically we are better off without them as they give rise to economic recession.

They themselves are caused by overdevelopment and give a cause to say the defecitary government is over borrowing, the zombie company is overtrading, the family to whom is lent are overdebted and people using money from their bank accounts are simply over-consuming.

Given the use of money, small loans and company leverage is unavoidable we are left to conclude it is government borrowing which is untenable. A business may find it unavoidable to go into debt to start trading, a government has no excuse. They set the example, indeed they get the ball rolling.

An economy should never run a deficit, especially not in a recession and definitely not if it is richer than the countries from whom it borrows. Sadly this is the case for most of the western economies including USA; they are promiscuously acquiring money from poorer countries, developing economies. This borrowing trap is a vicious circle or cycle which will result in the collapse of their values and value system as well as the western economics and western economic system. and therefore economies.

Against dependency economics

The borrowing trap will cause US-Europe and Japan to be so violently consumed with and by wealth and the drive towards wealth, they will relinquish control of world economics, macroeconomics will witness the rise of the many above the few. The present economic world will be eaten up from within by new conquering powers or superpowers: The supergroup; Pakistan, India and China, and other economies such as Indonesia will certainly surpass the present model of G7 economies.

The demise of US, Europe and Japan to Asian, Middle Eastern, dar al Islam economies will happen precisely because of the collapse of the selfish capitalist model which will then leave the christians without hope in their religion here in western Europe.

New powerhouses for manufacturing and bases of industry will emerge outside of western europe and eurocentricity will be destroyed by it's model's replacement with Islamic religious faith and praxis imported from Middle East, Asia and Africa. GB and many western european countries will come close to being Muslim countries, Dar al Islam in Islamic or scholarly terminology, and in US to Islam will become the dominant daily praxis, the religious daily bread.

A new economic core

A new economic periphery sub-periphery and core for the world:

Diagram 21: Reversal of first, second and third worlds.

With Pakistan as a new periphery economy, last century, America will become a sub-periphery in this century. UK, France and Germany will have a noticeable change in religion and language of their religion. Dependency theory assumes developing countries are dependent on developed economies. Independence theory states developing economies are independent of the developed world's economies until they are themselves independent. I will develop this more now.

4. Independence

Religiousness

Questions:

Will the denominational rule of the Church of England be turned into the outright domination of the religion of Al Islam? Given neither whites are a majority over non-whites nor christians are a majority over non-christians, are BME communities now a new misnomer? Can whites and/or christians be rightfully regarded as

an ethnic minority? Is the religious megamurder a new phenomena particular to the war o' terror? Are coloured folk the new normal? Are Muslims the assumption of a non-occupied or else occupied land and not the exception to the rule? Can Britain be liberated in the coming generation?

Ethnic minority status

White christian vs Muslim ash Shaoob

1. Megamurder
2. Political transference and theological replacement ("transformation")
3. Practibility (from impracticality)
4. Conquest

To

Occupiers vs non-occupiers

1. Liberation struggle
2. Failure of non-dar al Islam (economic and theoretical demographic)
3. Daily praxis (Usa as an example)
4. Weekly worship

A socio-economics or political transition here is being called for, not as in model 1 above, a racist or Marxist political religiosity. The long transition or long march of religious liberation has begun in the Middle East to defeat occupation and civil war and to heal itself.

If it is that this society must be divided along the lines of righteousness then liberated along or through righteousness then it is precisely because it shall no longer exist to live by the definitions of racial subjugation. Indeed to mobilise a Muslim, Arab revolution, we must defeat occupation, just like in Palestine, Syria, Iraq or Yemen.

We are to accept that we are to stop ourselves from using a methodology of slash and burn, search and destroy and learn to cultivate and develop the technique that has been adopted by our

eminent present generation of teachers in our holy lands. It is only if the next generation is given a chance to adopt a language of civility through occupation, religiousness through degradation that we can socio-economically impart a new religion to this part of the world, remembering the elders born of the holy and religious lands, where Islam is the rule and not just the exception to.

Threat of Islam

The war o' terror goes with a very dangerous language, one that exempts western christian peoples from, and indeed absolves the same from the crimes of the governments of, the course of megamurder.

One thing we must learn to take from the same language, though, is the word of occupation. As Arab national movements have correctly termed America occupier, so should we who live in the west. Why not? The native, indigenous people here don't have a problem with it.

The deciding factor here is not simply one of deciding who has created the state terror and who are it's victims, rather, when we want to know who gives Britain it's voice, who really creates the British voice, who voices Britain; we must surely answer along similar lines to the decisive megamurderers who have defamed religion and being religious in their crimes against humanity. By the same token as they are Eurocentric, we should be Pak-nationalist or Pak-nativist. If we are not any longer while we must be transformationally coloured, if we are no longer christian (Judeo-christian) we must be transformationally, in this case, transitionally Muslim. We must go beyond transference.

The transition is not termed a conquest or a military conquest. As a liberation it is to be socio-economic and religious. We have to emancipate the British Isles and change our religiosity from one of taking lives to one of giving life. We have to struggle to change Britian's religion to Islam.

We give life to our children, their needs are fulfilled in life by our efforts, so why can't we create a new generation here in Britain, one that will see itself as native, as part of our Umma or part of the

Umma as a whole, that is demographically stronger than the minority white, minority christian or else non-dar al Islam communities.

We must give life to our children who are non-occupier by rights of their falling victim to the evil of religious megamurderers abroad, murdering their ancestors. We must give the destiny of reparations a chance to be handed over from the occupier to the new generation.

Religious worship

Questions:

Is a religious majority particular to Britain as a white , christian land or unspecific to Britain and related solely to Islamic history? Will the issues of liberation, failure of non- dar al Islam, Dar al Islam itself, and megamurder of Muslims in the world, be addressed this generation at all? We have witnessed a constant depiction of Britain as non-dar al Islam, once it is no longer acceptable, will dar al Islam be a more acceptable definition for Britain? Are we, being an EU country happy to court the same definition of Dar al Islam like Spain, Portugal and other European countries? If EU represent the security and safety aspects of Dar al Islam in Western Europe, does Eastern European Islam represent the border states aspect of definition? Are people of Britain content with being part of the Muslim world given it is becoming impossible to define them as such as apart from the Muslim world? Is there a civil war in this country with so-called terrorists, the freedom fighters? Can the present birth of, for example in the London Borough of Tower Hamlets, more Muslim babies than non-Muslim babies give rise to a spread of Islam throughout London and then the rest of the country and the British Isles as a whole? Will Christianity, adopted by Henry the eighth be abandoned as the state religion in favour of Islam?

Past religion and it's relevance

The possibility of civil war as a spillover from war in the middle East means it is wise for Muslims to define terrorists as good old-fashioned freedom fighters.

It is the present definition of freedom fighters as terrorists that keeps a civil war from emerging because it stops our philosophy of Dar al Islam and our religion of Islam from being accepted and taught in religious, educational and other institutions. How would it hurt the establishment if a couple of more score Britons paid the full price for our foreign policy? It hasn't caused any remorse when millions of Afghans or Iraqis do? The system tells us otherwise but the real reason the security establishment can't afford hundreds of lives lost to Islamic or Muslim jihad is that a conspiracy will be revealed.

Without "world" wars against our khilafah in Islam and our allies, there would have been no American century and without meaning to sound strange, the conspirators are now blaming us Muslims for the possibility of a future civil war too. An Islamic British civil war or properly termed a Muslim British civil war is just one of many means the American military industrial complex can avert the spread of our philosophy of dar al Islam and our religion of Islam. The fall of british legal institutions in Europe, that is the fall of Britain will bring the American century to an abrupt halt. When US deems itself a purveyor of rights here, it is western Europe on the way of dar al Islam, Eastern Europe providing the dawlat al Islam aspect.

The present religious situation

There is at present a failure of non-political Islam. The bottom line of the safety net is that the security situation leads, in the relationship with the Muslim world to a concept of deyar e ghair, an outside concept, alien to Islamic jurisprudence.

Future religion

Tower Hamlets, which has more Muslims than Christians, and over 50 % of the under tens are Muslims; represents the seed of Islam in Britain. If we notice that most London boroughs, similarly to London Borough of Tower Hamlets are to adopt the relative Muslim

majority within 20 years time, surely it is right to expect a dar al Islam within 40 odd years time.

This is the borough housing the tower of London, where Henry eighth slayed his wives, fitting it should be where his reformism be reformed once and for all.

Religion

Questions:

Now Catholicism was abandoned can protestantism too be forsaken? If Iraq, Syria, Pakistan, Yemen etc. have no due diplomatic process to decide who is in charge versus who is occupying, can we therefore conclude some people are, by nature, occupiers? If science is a new force in front of religion, then is not the negation of the hypotheses of Christianity the only solution to the problems of schismaticism, civil war, aggressive foreign policy and so on? The Holy lands are Holy, since NO holy lands are christian, can we conclude christianity is unholy? War is the christian solution to it's unholiness, surely it should be peaceable to arrange a final solution for christians throughout the world not just in the Holy lands? What begins with transference of power and transformation, becomes emancipation from worldliness. This is soon to be replacement. When will Britain's being part of a Muslim empire be practical?

Past humanisms

- Catholicism in the UK, like Islam, is a mega religion inspite of Henry 8th's supposed reformation and the so-called "church of england", parallels both with Islam in modernity and Christianity in the sense of reformed Christianity. Given it was forsaken by Henry the eighth and now church of England attendance is in only the thousands, surely it is time to end Christianity altogether?
- Typical humanist developments Science and religion - British-born right-wing extremists are being educated away from their corrupt thought of doing evil to Muslims. This brings the

dichotomy of Holy and Pak (Urdu for holy), and those who exhibit the opposite or the lack of the same.

- Attribution of changed religion - Instead of Oxford University saying 2066 is the year White British will be in minority, they should do something positive and say such and such year Muslims will inshallah be a majority.

Past, present and future – Al Islam

We must learn to forgive and forget is why we are here, but to avoid the war against Islam recurring we must try to liberate UK, USA and so on for our coming generations, predicted to be majority Muslim or almost.

If mankind's history is perceived of as Islamic and good precisely because of a heavy Islamic reality, the reality of today is highly Islamic, then surely we should look towards an Islamic future and look forward to the same.

We, the people, are not simply interested in talking reparations, we demand UK and USA to obey Allah ta Ala. Religiousness, religious worship and religion all are for Allah ta Ala, even in UK. Daily praxis and our Minhaj (weekly Islamic worship) and one day this century, admissions of religion, are in Islam. It is a matter of Rab vs riba, in any social science. We must prefer God (Praise be to Allah Almighty) to riba economics.

5. Other factors

New Indology

There is a new economic world in the offing, a breath of fresh air; living, breathing economies in which the poor of the world are now powerful. Empowering the agricultural systems of the continents and sub-continent with internet methods etc. will see the emergence of new titans to rid the world of the old regime once and for all. Through the control of water and its application outside of agriculture, we will be able to cleanse our womenfolk and therefore educate our children to form the new generation.

Amidst this new economics and indeed amidst the emergence of the new economies which are conquering the old guard, is a new insightful technique of management, Practice A. What is Practice A? Practice A is basically the Pakistani management style and job design. How does it work? It works by replacing the English and American models. How do you exercise Practice A? By abandoning theories X, Y, and Z. Where do you implement practice A? The peak of a mountain top. Practice A or Exercise A is doing your best to succeed, Allah Malik. B, C and D are merely theoretical or philologist or psycho linguistic.

Simply because the world is a realm of action not a realm of reward, only the afterlife is a realm of reward, so practice A is a realm of action without reward. Indeed like we have no planet B in ecological affairs, we have no Practice B. Like we have decided theories x,y and z or anglo-american management is profane, so Practice A is a Divine form of management.

Examples of indological heroes:

Alexander: Neither Christian nor Jew, this European son was closer to being Pakistani than historically of non-Greek European countries'. A student of Arastu's, he was allowed his tribes to stay in Pakistan till today. Alexander as an early Pakistani or not can be compared as less like his teacher, Arastu, envisaged as less like even Plato or Socrates, but yet more like Nabi Ibrahim (A.S.). Prophet Abraham (P.B.U.H.) was the harbinger; through his descendents, their immediate descent and their immediate descent, of Babylon, Ash sham and Misr's antiquity. Whereas Abraham (A.S.) before him had in effect united the three great civilisations in monotheistic religions: Babel, from where he was born and came, Shaam, to where he went, and Misr, where his great grandson was exiled; Alexander liberated through his military might, the Byzantine empire of his, spanning Egypt through to India, present day Alexandria to the Pakistani kailash, who owe their history to him. A prodigy of Aristotle's, Sikander as he is known in the Pakistani sub-continent was a young man and reached Pakistan allowing the tribes of the local area to avoid battle and too much bloodshed, annexing Panjab into the Macedonian empire in the battle of Jhelum, 326 BC.

Demetrius 1,2 and 3: Demetrius was a known Indian king and too a student of Arastu's. Demetrius 2, the Greek king of India, similar to Alexander, who fought the battle of Jhelum, was more a Pakistani than a native of a European country as such. Demetrius 3 was a non- Bactrian king of India. He was a Punjabi.

Taxila was an Indian capital loved by the ancient Pakistani people. Demetrius, from greek devotee of Demeter, mother earth, was a conqueror of the area, creator of an Indo-greek kingdom before christ. Gandharan art, usually of heads, busts or even bodies' statues, capture ancient heroic figures such as Gautama siddharta buddha, or in Greece, Demeter, mother earth statue.

Omar The Great (R.A.): What the Patriarchs achieved over four generations, this man achieved in a lifetime. The conquest and emancipation of Babylon, Shaam and Misr. Omar (R.A.) was great beyond Alexander: Alexander conquered 18,00,000 square miles area with a strong and organized army during his 10 years kingdom. On the Other hand Hazrat Umar Farooq (RA) conquered 22,00,000 square miles area without any trained army during 10 Years (Including Rome and Iran superpowers of that time.) Omar al Farooq was, of course, great in very many respects, beyond Sikander. In age, he was too far older when he was liberator of lands, and this is something that speaks volumes not of his hot-headedness but of his cool-headedness, maturity and self-control. Was Caliph Omar (ra) greater than Nabi Ibrahim (AS)? Did Jesus think so? Did the truth set him free? "Before Abraham was, I am." could be a reference to the second caliph of Islam no doubt, bearing in mind the instant conquest of the successors or rightly-guided successors to Prophet Mohammad (SWS).

Dar al Islam - India has been dar al Islam since way before the British went there. Indeed all of the countries of the subcontinent bear the green colour of Islam. Dar al Islam and dharmicism go hand in hand, linguistically and in terms of the science of civilisations too. Dar al Islam is defined as safe and secure land where Muslim rule of law is observed which has a Muslim neighbouring country.

Therefore the Ummah expands from the centre. As I have already mentioned, Muhammad bin Qasim conquered Pakistan and Mahmud of Ghazni, India but can the majority hindu faith really be discounted to value a Muslim rule of law?

The thing is outside of the subcontinent there is fiqha which says that once a land has been established dar al Islam it always remains so, like a mosque, once a land has been set aside for the purpose of congregational prayer, it should always remain for that.

Modern writers such as Samuel Huntington in clash of civilisations defines cultures into 10:

Islamic, Islamic/hindu, hindi, buddhist, Sinic, African, Orthodox, Latin American, Japanese and Western.

Islamic studies and Arabic

It is the religious duty of Muslims to do proper tajweed and tafseer in reading of Holy Quran, ahadeeth and the exegesis. To understand the authenticity of the Holy Quran and Sunnah we must emphasise the inviolability of the Holy Quran and infallibility of the companions of the Holy Prophet (SWS).

The key to this is tafseer of the Holy Book, reading and understanding. If we do this well we don't need to know about what is other things like taweel, tarjeeh and itihad or ijtiihad. English, Spanish and Chinese are too dissimilar to Arabic and are second rate in terms of interest and relevance.

The Middle East

Early Muslim scientists had studied India and worked on the science of Indology. Biruni was a scientist and author of Indica and kitab al Hind, in the time of Mahmud al Ghazni, conqueror of India. Muhammad bin Qasim, of course was conqueror of Pakistan, in the time of al khaleefat e Ummaya, a few hundred years previously.

China

China is the like India in that both are considered civilisations in their own right, unlike many, if not all European countries. China, European commentators dismiss as having a much greater economic growth rate, but, at GDP PPP of 21 trillion (2017), it's annual incremental gross domestic product, purchasing power parity, it's contribution to the world economy every twelve months is in the trillions. More than the majority of European countries' GDP. That means, being say twelve times the greatest European country, it adds a whole Euroeconomy to itself every year.

Peripheral Europe

If all the people of Europe, including USA and Japan got together they would still be more people than that in India. A day is coming Indian GDP will be unmatched in US, Europe and Japan. The great Middle Eastern civilisations, Pakistan, for example, and India and China are economic centres, Europe has always been, historically a periphery, and traditionally will remain, a periphery.

If India is after all the richest economy soon, it is equitable. It is an economy of scale.

Egyptology

- *Bucaillism* - Bucaillism uses the metaphor Allah Almighty uses of the Pharaoh being converted to Islam and then preserved in physicality. Today, advancements in science based in the Holy Quran are sometimes referred to as Bucaillism.
- *Divine textual foreknowledge in science* - Embryology, Geology, Biology all bring evidences from The Holy Quran backed up by science to support Boucaille's hypotheses. Indeed it is God's word that Bucaille is seeking to confirm through these sciences.
- *Moses (PBUH)* - French leader had to bow to Rameses II, who wanted to kill Musa (AS) in 1981 when Bucaille had him commissioned from Egypt. Out of Pharaoh, Haman and Carun, only Firawn Mernptah was a Muslim. Bucaille, upon reading how his, i.e. Mernptah's body was preserved, changed his name to Yahya and too embraced Islam and served the religion in Saudi Arabia as King Faisal's personal physician. Bucaille was

researching and made the discovery of extra salt in the body. Interestingly, in the Holy Quran, Firawn bears witness that there is no other God but Allah, the God of the Israelites.

- *Real monotheism* - There is one true and real God Almighty, Allah ta Ala, and one real and true religion, Al Islam. This was the religion since time immemorial, since time began. All of the Prophets of God bought this message from the first human being.
- *Mummies* - Mummies are preserved by salt when prepared. The amount of salt can tell us if they were ever in water and how long they were in water, and so on. Bucaille concluded Merenptah's Mummy had been pulled from the red sea.

Modern Indology

London and dar al Islam - London is a term used for Western Europe and North America. There is no way it can survive this century as it is historically. As we know it today, it will be eaten up from the inside by Islam.

The long transition from religion which is not for God, to religion which is against sodomy, illegitimacy, alcohol, interest and prescribes prayer at fixed times, fasting, pilgrimage; the religion acceptable in the sight of Allah, Al Islam, is only beginning in western Europe, America, it may be 60 years before it is completely established as the house of prayer, dar al islam, across the board.

- *Modern Indology* - Londonistan is modern Indology, New Londonistan is modern Indology, Londonistan is a land of Islam. Potential dar al Islam. Future dar al Islam, soon it will be more Muslim than Christian.
- *Antiquarian Egyptology* - The propounding of the law of Moses (PBUH) in the Gospel means the Mosaic law is invalid.
- *Schismaticism or schizophrenia?* - The schisms of christianity are the root cause of the terrorism in the world as we know it. The catholic and protestant terrors are an evil which some even dare to say has spread into other religions. This comes from psychological schismaticism?

- *Eastern European Islam* - Albania, Bosnia, Kosovo, Turkey are all examples of great civilisations in Europe in which the majority of people practice Islam as a religion.
- *Western European Islam* - Muslim Spain and Portugal, because they were majority Muslim lands, ruled by Muslims and border states were Muslim states, are deemed dar al Islam.

First generation immigrants, second generation blues, third generation charm, fourth generation conquerors?

After all the millions of innocent people the British and American (and French, German and Dutch etc.) were killing around the world for the last few hundred years were all innocent and the Angels of God are no doubt angered by this, when military means are used to kill millions of Muslims who TOO are innocent, bringing the total of Eurocentricism's murder to billions.

Indeed it was us Muslims who died by the scores of millions in the times of slavery, Russian holodomor, Indian famine and Chinese famine. Now it is us Muslims who are killed by the million in Iraq, Syria and Afghanistan. All our people are innocent victims, lives lost to the wars of Iraq, Syria and Afghanistan. Of course it is our people who have suffered the most from world wars fought against our caliphate, from holocaust or holodomor.

Megafamine was something from the past, today we should make megamurder a thing of the past. These evildoers must know if they go to war, if they come back, they may not have a country left! Because I say to the leaders of our "foreign policy", if you wage wars abroad, who knows whether or not you will have a country upon your return from war.

The khilafah may be doing your dirty work at the moment but once we dispel you from the holy lands what is going to happen is, due to mutual dissatisfaction, we will come and march in your America and western European countries. There is a saying in Palestine, the khilafah will clip the nails of America, cut off his hands and then march upon it's soil!

Today the beliefs, behaviours and belonging in America has shifted to Islam, with USA eating from now on Muslim daily bread. In the future America will be run as our government with our army and for our people.

Church of England data reveals their attendance at churches is tending to zero by 15 years time (2033) and their population by 2066, in 48 years time. Why not we focus on our, Muslims' practicality and indeed the pragmatic view that we are already more observant of Islam here in UK and soon will be a Muslim relative majority, inshallah?

The idea is, now great Britain is a mosque-going country, where, since the turn of the century, daily observance of faith practices, specifically prayer, and since 2008, weekly congregation (similar to church membership in USA) in places of worship has been upheld in the Islamic faith, in mosques in Britain.; UK and soon USA cannot any longer be christian countries.

This is because daily observance, weekly congregation and admissions form the criteria for the religion of practice. If our, as Britons, days and weeks are devoted to Allah Almighty, one day we will become majority Muslim, and further then it will not be possible to consider the other faiths, including Christianity (the occupying faith), as our faith.

In fact, as we say our daily, weekly prayers and so on, we incorporate religious ideas into our lives; Bereshit, sabbath etc are now part and parcel of the fact of Muslim takmeel in "London" (UK and USA). They mean nothing regarding Judaism and Christianity without reference to Islam.

When, in 2040, as predicted, Islamic adherents (Muslims) outnumber Christians or Jews or Hindus (taken in isolation), a new definition of dar al Islam should be applied by the non- scholarly generation. This would mean maturity coming quicker to Muslims than our own scholars (religious scholars) would admit.

Is it not true the government owes it's duty to our people, the people, and not solely to scholars of religion? A Britain which has

an Islamic sociology is one, which without a doubt should have an Islamic ruler (Muslim rule). When can we expect this?

We, as Muslims are notorious for saying “No” to democracy; will be in a position to decline it, when for the first time in history, it presents itself to Muslim rule, and not at gunpoint.

Sociologically, we are looking, due to ageing European populations, at mature religion (religious admissions) as separate from immature religion (less or minor religious admissions). If we do this it is because of the value of liberty as a virtue in the west. If the people have chosen Allah Almighty, to whom belongs praise, as theirs and failed to associate partners with Him, on a daily basis and a weekly basis, in places of worship (ordained by this government), why should any government argue with that, who are they to argue and is it really possible to return with regards to religious admissions?

The facts are simple. We live in a pro-choice environment. Once a country practises a daily praxis and practices a weekly communal activity more than any other; it has an effect on the statistics, and on the government. The system of worship necessarily supersedes the system of governance.

Within 15 years statistics revealing Islamic sociology will be shocking the world regarding London. 33% Muslim compared to 32% Christian is what I predict. What are we waiting for? Is it not time to ruin the churches? Is it not time to abandon the magna carta? Is it not time to reform reformation to where Christianity is an ethnicity or a minority? What is the alternative? Apartheid? White minority rule? Civil war? Occupation?

Like south Africa or the occupied Palestine, a minority will rule a majority! Can we not at least admit it now? Can we not be mature enough to admit christianity is wrong and replacement theology must be replaced by Islam; liberation theology must be abandoned in favour of Muslim rule, and that Judeochristianity should give way to Islamo-Christianity as a form of polity and civilisation.

6. Dawlah al Islamiyah

The Asian century

The death of the American century has spelt the birth of the Asian century and the rise of the tiger, the elephant and the dragon; Pakistan, India and China. The death of Israel this century would be the death of the little satan too.

Seven stages to dawlah al islamiyah

- Ethnic minority status like the Shinjiang autonomous area in China, where Hui and Uighur Muslims are settled.
- Relative minority- could even be a former dawlah al Islam such as India
- Daily praxis- Muslims are daily practitioners of faith and religion of Islam, such as in the United States of America (above any other religious denomination)
- Weekly praxis- Muslims are the weekly practitioners of faith and religion, such as here in the United Kingdom (above any other religious denomination)
- Relative majority- Muslims are a relative majority and there is no other religion that is more popular as a religion according to admissions of religion. Festivals and Holy days are observed and officially at local level government
- Dar al Islam or absolute majority. The faith of Islam is the rule and the norm and Muslims are safe and sound, there are Muslim border states and no aggravating circumstances.
- Dawlah al Islamiyah- Muslim civil state and government.

The preconditions of the Islamic civil state

There are countries in the world such as India and China which have historically given birth to hundreds of millions of Muslims each and yet are lands where Islam is a silent minority or an ethnic minority and lands such as Palestine and Lebanon, where Islam is

a land of the origins of, for example the Bible. There are further lands such as Pakistan, from where the origins of Dharmic faith come which are Islamic states in the full sense of the words. Between the first and the second groups are the vast array of lands going from secular to Islamic. Given that only India and China are recognised as Muslim minority countries and these are minorities in the hundreds of millions, they are deemed Islamic democracies. The western so-called nations are deemed Islamic republics. Here dar al Islam or Muslim majority is possible in fact, it is probable in the lifetimes of our children.

This should be recognised as the foundations for the Islamic state, they are a blowing hot and cold for the warmth of the Islamic state.

The struggle of establishing a civil state, the tip of the iceberg

Diagram 22 - The continuum of Islam and society

The call to arms and the struggle is never more than where a new relative majority is to be established as displayed above (stage 4 in dawlah al Islamiyah). Here the example of Burmese Rakhine state,

Bosnia or Muslim China is never far away. Lands where Muslim majority has come before Muslim rule (Stage 5 in dawlah al Islamiyah) leave a potential for bad things to happen to Muslims forced upon by the occupying government.

The reason behind this is clear, in that Lebanon, being a dar al Islam in the conventional sense is closer to dawlah al Islam (Islamic government) than occupied Palestine.

Indeed it is following this logic, of the superiority of Islamic civil states, that we in east and west can progress as civilisations and cultures. Albeit we are seen to have to turn western cities into a "Beirut" for the time being. This is the future for America it doesn't take a genius to work that out.

Once people pray more to Allah than "Jehovah" or the so-called holy father, then we will have to rise militarily in the States because our holidays won't be being taken and our religious festivals won't be being observed by the people. Indeed very soon Americans will have to create Muslim holidays because at State level not doing so will mean denying the masses their right of government and their duties at a religious level. This is what UK is facing today, and so is Europe as a whole. UK needs to do Eid not Christmas, it is a model Palestine (including the occupied territories), USA needs Friday as it's weekly worship holiday not Sunday. It needs to look at the British model and see how the sun set on the empire, why, and accept that it now sets on America too.

Alhumdulillah.

Londonistan (New Pakistan)

Pragmatism tells us that whereas Judeo-Christianity wars against Islam and the people of The Middle East and so on; the drivers for action, equality and power will create religious praxis in both East and West. Thus a new hegemony and pedagogy is created, the rituals of birth, life, death and afterlife; all practised as mosque-going peoples, in mosques.

Londonistan is an exposition of the fact of ageing christian populations in the west spelling the rise of, or maturity of Islamo-christian civilisation.

Pakistan, created last century, is now the economic world's new peripheral power, it will outgrow the size of most European countries as India outgrows America, something China, the new economic core of the world, has already done.

Independence theory informs us that, unlike dependency theory which assumes developing countries are dependent on developed countries for development; the respected Asian, African, Middle Eastern and South American countries will liberate themselves until they eventually liberate the North American, European and Japanese countries and Islands.
